Cancer by migrant background in Belgium

A registry-based study on patterns and determinants

PhD thesis

to obtain the degree of PhD of the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans

and

to obtain the degree of
doctor of Sociology
at Vrije Universiteit Brussel

Double PhD degree

This thesis will be defended in public on

Thursday 10 June 2021 at 14.30

by

Wanda Monika Johanna Van Hemelrijck

born on 21 June 1991
in Anderlecht, Belgium

Supervisors

Prof. Helga A.G. de Valk

Prof. Hadewijch Vandenheede

Assessment Committee

Prof. C.O. Agyemang

Prof. P. Bracke

Prof. L.B. Meijering

Prof. C. Vanroelen

Table of contents

List of Figures	7
List of Tables.....	8
List of Co-authors	11
Chapter 1. General Introduction.....	13
1.1 Focus and relevance of the dissertation.....	14
1.2 Defining ‘migrant background’	16
1.3 Research Setting	18
1.4 Cancer: definitions and context	22
1.5 The intersection between cancer and migrant background: an overview of the scientific knowledge and literature.....	27
1.6 Data sources	42
1.7 Outline of this thesis	45
Chapter 2. Cancer mortality by migrant background in Belgium during the 2000s: Patterns and social determinants.....	49
Abstract	50
2.1 Introduction	51
2.2 Materials and methods.....	52
2.3 Results	54
2.4 Discussion	65
Chapter 3. Neighbourhood migrant composition and tobacco-related cancer mortality: a census-linked study among five migrant origin groups in urban Belgium	69
Abstract	70
3.1 Introduction	71
3.2 Materials and methods.....	75
3.3 Results	80
3.4 Discussion	102

3.5 Supplemental materials.....	108
Chapter 4. Breast cancer by migrant background in Belgium: lower risk, but worse survival in women of non-European origin.....	121
Abstract	122
4.1 Introduction	123
4.2 Materials and methods.....	126
4.3 Results	131
4.4 Discussion	139
4.5 Supplemental materials.....	143
Chapter 5. Cancer risk among individuals of migrant origin in Belgium during the 2000s - Evidence of migration as a 'cancer risk transition'?... 	151
Abstract	152
5.1 Introduction	153
5.2 Materials and methods.....	157
5.3 Results	161
5.4 Discussion	171
Chapter 6. General discussion.....	179
6.1 Summary of the main results.....	180
6.2 Interpretation of key findings.....	184
6.3 Methodological considerations.....	201
6.4 Implications.....	206
References	221
English summary.....	253
Nederlandse samenvatting	261
Acknowledgements	269
About the author.....	275

List of Figures

Figure 1.1 Composition of the resident population by migrant background in Belgium, October 1 st , 2001	20
Figure 1.2 The cancer (control) continuum	24
Figure 1.3 The social determinants of cancer in the country of destination.....	32
Figure 1.4 Structure of the Census-linked Registry Data used for the mortality analyses	43
Figure 1.5 Structure of the Census-Belgian Cancer Registry Data used for the incidence analyses.....	44
Figure 1.6 Structure of the Census-Belgian Cancer Registry Data used for the survival analyses.....	44
Figures S4.1a-f Age distribution of the study population by migrant background	143
Figures S4.2a-f Age distribution of the study population by migrant background, split up by generational status	144

List of Tables

Table 2.1 Background characteristics: Percentages for urbanisation, educational level, housing comfort, and employment status by migrant background and total numbers	55
Table 2.2 Indirectly standardized cancer mortality rates per 100,000 person years, 95% confidence intervals and observed numbers of deaths by migrant background for men aged 40-69.....	57
Table 2.3 Indirectly standardized cancer mortality rates per 100,000 person years, 95% confidence intervals and observed numbers of deaths by migrant background for women aged 40-69.....	59
Table 2.4 Cancer mortality rate ratios and 95% confidence intervals by migrant background for men aged 40-69	61
Table 2.5 Cancer mortality rate ratios and 95% confidence intervals by migrant background for women aged 40-69.....	63
Table 3.1 Characteristics of the study population at baseline (2001) by migrant origin group, listed as percentages unless otherwise stated.....	82
Table 3.2a Tobacco-related and lung cancer mortality rate ratios for same-group presence by migrant origin with 95% confidence intervals, continuous indicators for same-group presence	85
Table 3.2b Tobacco-related and lung cancer mortality rate ratios for same-group presence by migrant origin with 95% confidence intervals, categorical indicators for same-group presence.....	87
Table 3.3 Tobacco-related cancer mortality rate ratios for the product terms between same-group presence and generational status and their basic effects, by migrant origin with 95% confidence intervals.....	96
Table 3.4 Tobacco-related cancer mortality rate ratios for the product terms between same-group presence and educational level and their basic effects, by migrant origin with 95% confidence intervals.....	98
Table S3.1a Lung cancer mortality rate ratios for the product terms between same-group presence and generational status as well as their basic effects, by migrant origin with 95% confidence intervals.....	108

Table S3.1b Lung cancer mortality rate ratios for the product terms between same-group presence and educational level as well as their basic effects, by migrant origin with 95% confidence intervals.....	110
Table S3.2a Tobacco-related cancer mortality rate ratios excluding lung cancer for the product terms between same-group presence and generational status as well as their basic effects, by migrant origin with 95% confidence intervals	114
Table S3.2b Tobacco-related cancer mortality rate ratios excluding lung cancer for the product terms between same-group presence and educational level as well as their basic effects, by migrant origin with 95% confidence intervals	116
Table 4.1a Description of the population at risk in Belgium on January 1 st , 2004 by migrant background (in percentages unless indicated otherwise).....	132
Table 4.1b Description of the breast cancer patients diagnosed between 2004 and 2013 in Belgium by migrant background (in percentages unless indicated otherwise).....	133
Table 4.2 Truncated age-standardised incidence rates for breast cancer and five-year relative survival for breast cancer patients with 95% confidence intervals	136
Table 4.3 Adjusted incidence rate ratios for breast cancer diagnosed between 2004 and 2013 with 95% confidence intervals.....	136
Table 4.4 Five-year relative excess mortality risk ratios for breast cancer diagnosed between 2004 and 2013 according to migrant background with 95% confidence intervals.....	137
Table 4.5 Truncated age-standardised incidence rates for premenopausal breast cancer and relative survival for premenopausal breast cancer patients with 95% confidence intervals.....	137
Table 4.6 Premenopausal breast cancer incidence rate ratios and relative excess rates with 95% confidence intervals by migrant background split up by generational status	138
Table S4.1a Description of the population at risk of premenopausal cancer in Belgium by migrant background split up by generational status (in percentages unless indicated otherwise)	147

Table S4.1b Description of the population diagnosed with premenopausal cancer in Belgium by migrant background split up by generational status (in percentages unless indicated otherwise).....	148
Table S4.2 Adjusted incidence rate ratios for breast cancer diagnosed between 2004 and 2013 with 95% confidence intervals.....	149
Table 5.1 Summary of cancer types included in the study and their characteristics	157
Table 5.2 Description of the study population aged 50 to 74 years at the start of follow-up (01/01/2004) based on information at census (01/10/2001): native Belgians and first-generation migrants subdivided by duration of stay in Belgium.....	165
Table 5.3 Truncated age-standardised incidence rates, unadjusted incidence rate ratios and 95% confidence intervals for Belgians and first-generation migrants aged 50 to 74 years, subdivided by gender and duration of stay in Belgium, 2004-2013	167
Table 5.4 Adjusted incidence rate ratio's and 95% confidence intervals for first generation migrants aged 50 to 74 years, subdivided by gender and duration of stay in Belgium, 2004-2013	169
Table 6.1a Estimated share of the population that uses tobacco, overconsumes alcohol and consumes five fruits and vegetables a day by country of birth in percentages with 95% confidence intervals, ages 40-69, information from the Health Interview Survey (pooled 1997-2001-2004-2008-2013 waves)	215
Table 6.1b Estimated share of the population with overweight status, physical activity, and screening attendance by migrant background in percentages with 95% confidence intervals (CI), ages 40-69 or target ages for screening, information from the Health Interview Survey (pooled 1997-2001-2004-2008-2013 waves).....	217
