TABLE OF CONTENTS

Chapter 1	General Introduction	9
Chapter 2	The association between a parental family history of dementia and midlife modifiable risk factors for dementia: a cross-sectional study using propensity score matching within the Lifelines cohort	23
Chapter 3	Cross-cultural validation of the motivation to change lifestyle and health behaviours for dementia risk reduction scale in the Dutch general population	53
Chapter 4	Knowledge, health beliefs and attitudes towards dementia and dementia risk reduction and the intention to change health behaviour among the general population: a cross-sectional study	77
Chapter 5	Knowledge, health beliefs and attitudes towards dementia and dementia risk reduction among descendants of people with dementia: A qualitative study using focus group discussions	115
Chapter 6	The validity and reliability of a digital Ruff Figural Fluency Test (RFFT)	135
Chapter 7	Uptake and effectiveness of a tailor-made online lifestyle programme targeting modifiable risk factors for dementia among middle-aged descendants of people with recently diagnosed dementia: study protocol of a cluster randomised controlled trial (Demin study)	169
Chapter 8	General Discussion	197
Chapter 9	Nederlandse samenvatting	219
	Summary	225
	About the author	230
	Dankwoord	231
	Research Institute SHARE	235
