The work in this thesis was performed in the Photophysics and OptoElectronics group of the Zernike Institute for Advanced Materials at the University of Groningen in The Netherlands. The research was funded by the Dieptestrategie program from Zernike Institute for Advanced Materials.

Cover design: Dmytro Bederak. The cover depicts a colloidal quantum dot that is approaching the Earth like an asteroid. This is an allusion to the event which dramatically re-shaped the life on Earth approximately 66 million years ago.

The cover photo by Nathan Anderson on Unsplash. The structure of the PbS colloidal quantum dot is provided by Arjen Kamp.
