Experimental studies on anti-pathogenic and gut barrier enforcing effects of dietary fibers and human milk oligosaccharides

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will defend in public on
Tuesday 29 June 2021 at 12.45 hours

by

Chunli Kong

born on 7 June 1990
Henan, China

Supervisor

Prof. P. de Vos

Co-supervisor

Dr. M.M. Faas

Assessment Committee

Prof. T. Plosch

Prof. D. Poncelet

Prof. H. Wichers

Table of contents

Chapter 1	Impact of dietary fibers in infant formula on gut microbiota and the intestinal immune barrier	7
	Rationale and design of the thesis	38
Chapter 2	Modulation of intestinal epithelial glycocalyx development by human milk oligosaccharides and non-digestible carbohydrates	57
Chapter 3	Human milk oligosaccharides and non-digestible carbohydrates prevent adhesion of specific pathogens via modulating glycosylation or inflammatory genes in intestinal epithelial cells	79
Chapter 4	Preexposure of pathogens to human milk oligosaccharides and non-digestible carbohydrates reduces adhesion of specific pathogens to host cells by decoy-effects or attenuates bacterial virulence	111
Chapter 5	Human milk oligosaccharides differently modulate goblet cells under homeostatic, pro-inflammatory conditions and ER-stress	143
Chapter 6	Digestion, fermentation, and pathogen anti-adhesive properties of the hMO-mimic di-fucosyl- β -cyclodextrin	169
Chapter 7	Human milk oligosaccharides mediate the crosstalk between intestinal epithelial Caco-2 cells and <i>Lactobacillus plantarum</i> WCFS1 in an <i>in vitro</i> model with intestinal peristaltic shear force	193
Chapter 8	Distinct fermentation of human milk oligosaccharides 3-FL and LNT2 and GOS/inulin by infant microbiota and impact on adhesion of <i>Lactobacillus plantarum</i> WCFS1 to gut epithelial cells	221
Chapter 9	General discussion	255
Chapter 10	Appendices Summary Nederlandse samenvatting Acknowledgement Publication List	269
