Bacteria-targeted infection imaging

Towards a faster diagnosis of bacterial infection

Proefschrift

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen
 op gezag van de
 rector magnificus prof. dr. C. Wijmenga
 en volgens besluit van het College voor Promoties

De openbare verdediging zal plaatsvinden op

woensdag 8 september 2021 om 11.00 uur

door

Mattje Heuker

geboren op 8 december 1992
 te Groningen

Promotores

Prof. dr. J.M. van Dijl

Prof. dr. G.M. van Dam

Copromotor

Dr. M. van Oosten

Beoordelingscommissie

Prof. dr. H.J. Busscher

Prof. dr. R.A.J.O. Dierckx

Prof. dr. J.A.G. van Strijp

Paranimfen

Jorrit W. A. Schoenmakers

Lisanne M. Braams

Mafalda Bispo

The work described in this thesis was mainly performed in the Laboratory of Molecular Bacteriology, Department of Medical Microbiology of the University of Groningen and the University Medical Center Groningen (The Netherlands). The research described in this thesis was financially supported by the University Medical Center Groningen and the University of Groningen.

Printing of this thesis was financially supported by the Graduate School of Medical Sciences of the University of Groningen, the Groningen University Library, Mauna Kea Technologies, Gino software, and Studio Apenzaken.

Table of contents

Chapter 1	General introduction	8
Chapter 2	Preclinical studies and prospective clinical applications for bacteria-targeted imaging: the future is bright	18
Chapter 3	<i>In vitro</i> imaging of bacteria using ^{18}F -fluorodeoxyglucose micro positron emission tomography	42
Chapter 4	Non-invasive optical and nuclear imaging of <i>Staphylococcus</i> -specific infection with a human monoclonal antibody-based probe	60
Chapter 5	<i>Ex vivo</i> tracer efficacy in optical imaging of <i>Staphylococcus aureus</i> nuclease activity	84
Chapter 6	The smart-activatable P2&3 TT-probe allows accurate, fast, and highly sensitive detection of <i>Staphylococcus aureus</i> in clinical blood culture samples	102
Chapter 7	Bacteria-targeted fluorescence imaging for visualisation of fracture-related infections in orthopaedic trauma surgery	116
Chapter 8	Image-guided <i>in situ</i> detection of bacterial biofilms in a human prosthetic knee infection model: a feasibility study for clinical diagnosis of prosthetic joint infections	134
Chapter 9	<i>Ex vivo</i> visualisation of bacterial infection and pulmonary microbiological colonisation in resected human and porcine lungs using targeted optical endomicroscopy	156
Chapter 10	Summary, discussion and conclusion	182
Chapter 11	Nederlandse samenvatting	192
Chapter 12	List of abbreviations (<i>Afkortingenlijst</i>)	208
	Biography (<i>Biografie</i>)	216
	List of publications (<i>Publicatielijst</i>)	218
	Acknowledgements (<i>Dankwoord</i>)	220
