The Molecular Role of SERF in Amyloid Formation

A fine line between toxicity and function

Anita Pras

The research described in this thesis was mostly conducted at the European Research Institute for the Biology of Ageing, University Medical Center Groningen, University of Groningen, The Netherlands.

The research was supported by grants from de Cock-Hadders Foundation, the Boehringer Ingelheim Fonds (BIF), the Groningen University Institute for Drug Exploration (GUIDE) and the Alumni chapter Gooische Groningers facilitated by the Ubbo Emmius Fonds.

The Molecular Role of SERF in Amyloid Formation

A fine line between toxicity and function

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 1 september 2021 om 16.15 uur

door

Anita Pras

geboren op 30 oktober 1990
te Winschoten

Promotor

Prof. dr. ir. E.A.A. Nollen

Co-supervisors

Prof. dr. J. Schymkowitz

Dr. L.L.S. Janssen

Beoordelingscommissie

Prof. dr. J. Kirstein

Prof. dr. L.M. Veenhoff

Prof. dr. A. Kortholt

Paranimfen
Michelle Smit
Mandy Koopman

TABLE OF CONTENTS

Chapter 1	Introduction	9
Chapter 2	Aim and outline of this thesis	49
Chapter 3	Identification of SERF2 binding sequences using a peptide microarray-based approach	53
Chapter 4	SERF2 drives amyloid formation through charge complementation	81
Chapter 5	Preliminary study for the identification of SERF2 interacting proteins using a Virotrap screening approach	111
Chapter 6	General discussion and future perspectives	145
Chapter 7	Summary	163
Chapter 8	Nederlandse samenvatting	167
Appendices	Abbreviations	173
	List of publications	179
	Dankwoord/Acknowledgements	183
