WHEN MULTIPLE BECOME ONE

Tim Valk

COLOPHON

The experiments described in this thesis have been conducted at the Department of Human Movement Sciences at the University Medical Center Groningen, University of Groningen.

The project was financially supported by a grant from the University Medical Center Groningen (UMCG)

The PhD training was facilitated by the research institute School of Health Research (SHARE), part of the Graduate School of Medical Sciences.

When multiple become one

Understanding the coordination of degrees of freedom in
 synergies in goal-directed pointing movements

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. C. Wijmenga
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 15 September 2021 at 14.30 hours

by

Timothy Antonius Valk

born on 24 November 1992
 in Leeuwarden

Supervisors

Dr. R.M. Bongers

Prof. E. Otten

Co-supervisor

Dr. L.J. Mouton

Assessment Committee

Prof. T. Hortobagyi

Prof. A. Daffertshofer

Prof. G. Schöner

TABLE OF CONTENTS

CHAPTER 1.

General introduction	7
----------------------	---

CHAPTER 2.

Fixed muscle synergies and their potential to improve the intuitive control of myoelectric assistive technology for upper extremities	23
---	----

CHAPTER 3.

Context-independent and context-dependent synergies operate concurrently to produce human pointing movements in different contexts	53
--	----

CHAPTER 4.

Joint-angle coordination patterns ensure stabilization of a body-plus-tool system in point-to-point movements with a rod	75
--	----

CHAPTER 5.

Synergies reciprocally relate end-effector and joint-angles in rhythmic pointing movements	97
--	----

CHAPTER 6.

General discussion	125
--------------------	-----

CHAPTER 7.

Appendices	143
