Lewis Acids in Autocatalytic and Dearomative Reactions

Kirill Kulish

The work described in this thesis was carried out at Stratingh Institute for Chemistry, University of Groningen (The Netherlands)

Research Center for Functional Molecular Systems is kindly acknowledged for financial support.

Lewis Acids in Autocatalytic and Dearomative Reactions

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Friday 24 September 2021 at 12.45 hours

by

Kirill Kulish

born on 16 June 1992
in Ozersk, the Russian Federation

Supervisor

Prof. S. R. Harutyunyan

Co-supervisor

Prof. W. R. Browne

Assessment Committee

Prof. S. Otto

Prof. M. T. C. Walvoort

Prof. B. de Bruin

Table of contents

<u>Chapter 1. Introduction</u>	10
1.1 Introduction	11
1.2 Types of autocatalysis: direct activation of reacting centers	13
1.3 Types of autocatalysis: asymmetric autocatalysis	15
1.4 Types of autocatalysis: template-based autocatalysis	17
1.5 Types of autocatalysis: supramolecular autocatalysis	24
1.6 Types of autocatalysis: physical autocatalysis	25
1.7 Conclusion	27
1.8 Thesis outline	28
1.9 References	29
 <u>Chapter 2. Rational design of Lewis acid mediated autocatalysis</u>	 35
2.1 Introduction	36
2.2 Results and discussion	38
2.3 Conclusion	46
2.4 Experimental part	46
2.4.1 General Information	46
2.4.2 Description of reaction procedure and set up for following reaction kinetics using <i>in situ</i> Raman spectroscopy	47
2.4.3 Synthetic part	52
2.4.4 Kinetics	55
2.5 References	71
 <u>Chapter 3. Autocatalytic processes in amide reduction</u>	 74
3.1 Introduction	75

3.2 Results and discussion	79
3.2.1 Preliminary study of the borane reduction of amides	79
3.2.2 Kinetic studies: autocatalytic behavior confirmation	81
3.2.3 Kinetic studies: cross-catalytic behavior confirmation	84
3.2.4 Kinetic studies: catalytic reduction of esters	90
3.2.5 Mechanistic considerations	92
3.3 Conclusions	97
3.4 Experimental part	97
3.4.1 General Information	97
3.4.2 Description of reaction procedure and set up for following reaction kinetics	98
3.4.3 Synthetic part	99
3.4.4 Kinetics	118
3.5 References	127
<u>Chapter 4. Computation of amide reduction</u>	133
4.1 Introduction	134
4.2 Computational details	136
4.3 Results and discussion	137
4.3.1 Selection of molecules for the investigation	137
4.3.2 Structural analysis of AB complexes (A: 1a-h , 2a-h)	137
4.3.3 Structural analysis of the reduction TS	141
4.3.4 Discussion of IRCs and KIE	143
4.3.5 Proposed mechanism	148
4.4 Conclusions	149
4.5 Structural characteristics of 1/2a-h and IR spectra	149
4.6 Table with collected data for amides 1a-h and aldehydes 2a-h	154
4.7 References	155

Chapter 5. Autocatalytic [4+4] photodimerization of 1-azaanthracene ... 157

5.1 Introduction	158
5.2 Results and discussion	161
5.3 Conclusions	165
5.4 Perspectives	165
5.5 Experimental part	166
5.5.1 General information	166
5.5.2 Synthesis of substrates	167
5.6 References	170

Chapter 6. Lewis acid promoted dearomatization of naphthols 173

6.1 Introduction	174
6.2 Results and discussion	175
6.3 Conclusions	182
6.4 Synthetic part and additional experiments	182
6.4.1 General Information	182
6.4.2 Computational details	183
6.4.3 Lewis acid promoted tautomerization of naphthols to ketones: optimization	183
6.4.4 Lewis acid effect	184
6.4.5 Concentration effect	185
6.4.6 Mechanistic studies	185
6.4.7 Lewis acid promoted tautomerization of <i>N</i> -methylnaphthalen-1-amine (8)	193
6.4.8 Synthesis and characterization of compounds	194
6.5 References	203
