Gut mucosal gene expression in inflammatory bowel disease

The heterogeneous nature of inflammation

Proefschrift

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen
 op gezag van de
 rector magnificus prof. dr. C. Wijmenga
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 29 september 2021 om 12.45 uur

door

Werna Theodora Christine Uniken Venema

geboren op 2 mei 1990
 te 's Gravenhage

Promotor

Prof. dr. R.K. Weersma

Copromotor

Dr. E.A.M. Festen

Beoordelingscommissie

Prof. dr. C.Y. Ponsioen

Prof. dr. F. Koning

Prof. dr. F.G.M. Kroese

CONTENTS

chapter 1

Introduction

10

Thesis outline

26

chapter 2

The genetic background of
Inflammatory Bowel Disease:
From correlation to causality

28

chapter 3

Inflammation status modulates
the effect of host genetic variation
on intestinal gene expression in
inflammatory bowel disease

56

chapter 4

Single cell RNA sequencing of blood
and ileal T cells from patients with
Crohn's disease reveals tissue-
specific characteristics and drug
targets

88

chapter 5

Understanding human gut diseases
at single-cell resolution

116

chapter 6

Gut mucosa dissociation protocols influence cell type proportions and single-cell gene expression levels

132

chapter 7

Inflammatory bowel disease in patients with primary sclerosing cholangitis: a distinct form of colitis?

166

chapter 8

Discussion

192

chapter 9

Future Perspectives

202

chapter 10
