to obtain the degree of PhD at the University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 15 September 2021 at 12.45 hours

by

Cancan Qi

born on 12 April 1991
in Shandong, China

Supervisor

Prof. G.H. Koppelman

Co-supervisor

Dr. C.J. Xu

Assessment committee

Prof. A.P. Zhernakova

Prof. B.A. Raby

Prof. A.H. Maitland van der Zee

Table of content

SECTION I	<i>Introduction</i>	7
CHAPTER 1	General Introduction	9
CHAPTER 2	The role of epigenetics in the development of childhood asthma	25
SECTION II	<i>The role of DNA methylation in allergic respiratory disease</i>	57
CHAPTER 3	DNA methylation in nasal epithelium, atopy, and atopic asthma in children: a genome-wide study	59
CHAPTER 4	Nasal DNA methylation profiling of asthma and rhinitis	83
CHAPTER 5	Epigenome-wide association study identifies DNA methylation markers for asthma remission in whole blood and nasal epithelium	105
SECTION III	<i>Multi-omics approaches reveal molecular mechanisms of respiratory disease in human airway</i>	129
CHAPTER 6	Nasal DNA methylation at three CpG sites predicts childhood allergic disease	131
CHAPTER 7	Cell type eQTL deconvolution identified cell-type specific eQTL in the context of asthma	157
CHAPTER 8	Determinants of expression of SARS-CoV-2 entry related genes in upper and lower airways	165
CHAPTER 9	Summary and general discussion	187
APPENDICES	Dutch summary (Nederlandse samenvatting)	202
	Acknowledgement	208
	Curriculum vitae and publications	212
