Anosognosia of memory deficits in dementia: biomarkers, connectivity, and clinical aspects

JAIME DANIEL MONDRAGON URIBE

Anosognosia of memory deficits in dementia: biomarkers, connectivity, and clinical aspects

Jaime Daniel Mondragón Uribe

The research described in this thesis was performed at the University Medical Center Groningen, University of Groningen. The work was funded by Consejo Nacional de Ciencia y Tecnología and Research School of Behavioural and Cognitive Neurosciences (BCN), Graduate School of Medical Sciences (GSMS).

For publication of this thesis, financial support from the Graduate School of medical Science of the University of Groningen/ University Medical Center Groningen and BCN is gratefully acknowledged.

Anosognosia of memory deficits in dementia

biomarkers, connectivity, and clinical aspects

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 15 September 2021 at 11.00 hours

by

Jaime Daniel Mondragon Uribe

born on 25 November 1983
in Mexico City, Mexico

CONTENTS

CHAPTER 1

Introduction	9
--------------	---

PART I

In vivo biomarkers and progression to Alzheimer's disease

CHAPTER 2

Tau pathology, neurodegeneration, and neuronal injury biomarker co-occurrence in AT(N) characterized Alzheimer's and non-AD dementias.	26
--	----

CHAPTER 3

Short and long-term functional connectivity differences associated with Alzheimer's disease progression.	72
--	----

PART II

Neural correlates of anosognosia in the Alzheimer's disease and non-AD continua

CHAPTER 4

Functional Neural Correlates of Anosognosia in Mild Cognitive Impairment and Alzheimer's Disease: a Systematic Review.	116
--	-----

CHAPTER 5

Functional connectivity differences in Alzheimer's disease and aMCI associated with AT(N) classification and anosognosia.	178
---	-----

PART III

Clinical and social implications of anosognosia

CHAPTER 6

Clinical Considerations in Physician-Assisted Death for Probable Alzheimer's Disease: Decision-Making Capacity, Anosognosia, and Suffering.	227
---	-----

CHAPTER 7

General discussion and future perspectives	241
--	-----
