Brain network signatures of depressive symptoms

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. C. Wijmenga
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 22 September 2021 at 9.00 hours

by

Sonsoles Alonso Martínez

born on 11 September 1987
 in Vigo, Spain

Supervisor

Prof. G.J. ter Horst

Co-supervisors

Dr. R.J. Renken

Dr. J.B.C. Marsman

Assessment Committee

Prof. N.M. Maurits

Prof. A. Aleman

Prof. N.F. Ramsey

When riding a bike, we keep moving forward. If the wheels stop, we can't go any further. As the rider moves, a system of gears allows flexibility to save the ground changes. And the handlebar modifies the course when needed. Only this dynamism makes the journey possible. We could regard the healthy mind as a bicycle, a dynamic system we ride on through the paths of life.

Contents

Chapter 1	General Introduction	9
Chapter 2	Reduced spatiotemporal brain dynamics are associated with increased depressive symptoms after a relationship breakup	17
Chapter 3	The dynamics of functional brain networks associated with depressive symptoms in a nonclinical sample	43
Chapter 4	Recurrence of a depressive episode affects the brain's dynamic repertoire	73
Chapter 5	Can fMRI functional connectivity index dynamic neural communication?	89
Chapter 6	General discussion	111
	References	120
	Short Summary	136
	Korte Nederlandstalige samenvatting	137
	Curriculum Vitae	138
	Publications	139
