The role of the placenta in transmitting disturbed serotonin levels from the maternal environment

A comparative study with live-bearing fish, rats and humans

Laura Staal

The studies described in this thesis were carried out at the Groningen Institute for Evolutionary Life Sciences at the University of Groningen, and at the Aquatic Research Facilities (ARF-CARUS) of Wageningen University.

The printing of this thesis was financially supported by the University of Groningen and the Graduate School of Science and Engineering (GSSE).

The role of the placenta in transmitting disturbed serotonin levels from the maternal environment

A comparative study with live-bearing fish, rats and humans

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

vrijdag 22 oktober 2021 om 14.30 uur

door

Laura Staal

geboren op 17 juli 1991
te Groningen

Promotores

Prof. dr. J.D.A. Olivier
Prof. dr. B. Wertheim

Copromotores

Dr. T. Plosch
Dr. B.J.A. Pollux

Beoordelingscommissie

Prof. dr. M.J.H. Kas
Prof. dr. A.G.G. Groothuis
Prof. dr. J.R. Homberg

This dissertation is dedicated to
everyone suffering from a mental illness

CONTENTS

Chapter 1	General introduction	9
Chapter 2	Influences of maternal vulnerability and antidepressant treatment during pregnancy on the developing offspring	25
Chapter 3	The effects of prenatal exposure to a selective serotonin reuptake inhibitor on offspring development and reproductive success in fish with and without a placenta	39
Chapter 4	Transcriptomic changes in the placentas of pregnant women using a selective serotonin reuptake inhibitor	73
Chapter 5	Transcriptomic changes in rat placentas treated with a selective serotonin reuptake inhibitor	121
Chapter 6	General discussion	147
Appendix I	References	165
Appendix II	English summary	187
Appendix III	Nederlandse samenvatting	197
Appendix IV	Dankwoord	207
Appendix V	Publications	213
