No parts of this thesis may be reproduced or transmitted in any form or by any
means, without the prior permission of the author.

This study was financially supported by the Netherlands Organization for Health
Research and Development (Veni laureate 916.12.013 to prof. Wim Veling) and
Parnassia Psychiatric Institute. Financial support for the publication of this thesis
by the Parnassia Academy is gratefully acknowledged.

Promotores

Prof. dr. W.A. Veling

Prof. dr. H.W. Hoek

Beoordelingscommissie

Prof. dr. T.A.M.J. van Amelsvoort

Prof. dr. L. de Haan

Prof. dr. I.E.C. Sommer

Contents**Chapter 1**

Introduction 7

Appendix A: Design of virtual reality experiments

Appendix B: Immunology for dummies

Chapter 2

High psychosis liability is associated with altered autonomic balance during exposure to virtual reality social stressors 23

Chapter 3

Childhood trauma, psychosis liability and social stress reactivity: a virtual reality study 43

Chapter 4

Inflammatory cytokines and growth factors were not associated with psychosis liability or childhood trauma 63

Chapter 5

Th17/T regulator cell balance and NK cell numbers in relation to psychosis liability and social stress reactivity 85

Chapter 6

Immune dysregulation as an intermediate between social adversity and psychosis: a review 115

Chapter 7

Discussion 143
