Microfluidic Digestive Systems for Drug Analysis

Pim de Haan

Cover design: Tight junctions at Sacsayhuamán (Cuzco, Peru); Pim de Haan
Lay-out: Pim de Haan
Printed by: Gildeprint, The Netherlands

The work published in this thesis was carried out in the Pharmaceutical Analysis group of the Groningen Research Institute of Pharmacy (GRIP) at the University of Groningen, the Netherlands. This research received funding from the Dutch Research Council (NWO) in the framework of Technology Area COAST.

Microfluidic Digestive Systems for Drug Analysis

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Friday 19 November 2021 at 11.00 hours

by

Pim de Haan

born on 19 April 1991
in Assen, the Netherlands

Supervisor

Prof. E.M.J. Verpoorte

Co-supervisor

Dr. K.H. Mathwig

Assessment Committee

Prof. N.L. Allbritton

Prof. R.K. Truckenmüller

Prof. K.N. Faber

Table of Contents

Chapter 1	General Introduction	7
Chapter 2	Gut-on-a-chip models to study the behavior of toxicants and drugs	15
Chapter 3	Digestion-on-a-chip: A continuous-flow modular microsystem recreating enzymatic digestion in the gastrointestinal tract	43
Chapter 4	A microfluidic model for infantile <i>in vitro</i> digestions: Characterization of lactoferrin digestion	73
Chapter 5	A versatile, compartmentalized gut-on-a-chip system for pharmacological and toxicological analyses	87
Chapter 6	A highly stable, pressure-driven, flow control system based on Coriolis mass flow sensors for organs-on-chips	115
Chapter 7	SU-8-based micromolding of thin poly(dimethylsiloxane) membranes with micropore arrays	131
Chapter 8	Stereolithographic fabrication and characterization of immobilized enzyme reactors for <i>in vitro</i> digestions	145
Chapter 9	General Discussion	159
Appendices		165
	Summary	166
	Nederlandse Samenvatting	170
	Acknowledgments	174
	Biography	176
