Table of contents

Chapter 1	General introduction	9
Part 1	Outpatient management of patients with a diabetic foot	
Chapter 2	Treatment of clinically uninfected diabetic foot ulcers with and without antibiotics	21
Chapter 3	The effect of a multidisciplinary outpatient team approach on outcomes in diabetic foot care: a single center study	39
Part 2	Balloon angioplasty in patients with chronic limb-threatening ischemia	
Chapter 4	Below-the-ankle angioplasty in patients with critical limb ischemia: a systematic review and meta-analysis	61
Chapter 5	High-pressure, non-compliant balloon angioplasty for long and calcified infrapopliteal and inframalleolar lesions is feasible	79
Chapter 6	Drug coated balloon angioplasty vs. standard percutaneous transluminal angioplasty in below the knee peripheral arterial disease: a systematic review and meta-analysis	93
Chapter 7	Validation of an <i>ex vivo</i> flow model including magnetic resonance imaging to study the effects of endovascular treatments on the arterial wall	119
Part 3	Percutaneous deep venous arterialization for no-option CLTI patients	
Chapter 8	Percutaneous deep venous arterialization in patients with critical limb ischemia	139
Chapter 9	Volume flow and peak systolic velocity of the arteriovenous circuit in patients after percutaneous deep venous arterialization	149
Chapter 10	Development of a prediction model for the occurrence of stenosis or occlusion after percutaneous deep venous arterialization	167
Chapter 11	Postprocedural management in patients after percutaneous deep venous arterialization: a review and expert opinion	183
Chapter 12	Summary and future perspectives	207
	Nederlandse samenvatting	214
Chapter 13	Dankwoord	224
	List of publications	226
	Curriculum vitae	228
