CT lung cancer screening in China

The necessity to optimize target population

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 8 December 2021 at 9.00 hours

by

Yihui Du

born on 4 November 1990
in Anhui, China

Supervisors

Prof. G.H. de Bock

Prof. M. Oudkerk

CONTENTS

Chapter 1	General introduction	9
Part I Risk factors for lung cancer		37
Chapter 2	Lung cancer occurrence attributable to passive smoking among never smokers in China: A systematic review and meta-analysis. <i>Translational Lung Cancer Research, 2020, 9(2): 204-217</i>	39
Chapter 3	Airflow limitation increases lung cancer incidence in smokers: the Lifelines cohort study. <i>Submitted</i>	73
Part II NELCIN-B3 study: lung cancer screening in China		97
Chapter 4	Methods of computed tomography screening and management of lung cancer in Tianjin: design of a population-based cohort study <i>Cancer Biology & Medicine, 2019, 16(1): 181-188</i>	99
Chapter 5	Computed tomography screening for early lung cancer, COPD and cardiovascular disease in Shanghai: Rationale and design of a population-based comparative study <i>Academic radiology, 2021, 28(1):36-45</i>	115
Chapter 6	Community-based lung cancer screening by low-dose computed tomography in China: first round results and a meta-analysis <i>Accepted for publication in European Journal of Radiology</i>	135

Part III Cost-effectiveness and harm of lung cancer screening	171
Chapter 7 Cost-effectiveness of lung cancer screening with low-dose computed tomography in heavy smokers: a microsimulation modelling study <i>European Journal of Cancer, 2020, 135: 121-129</i>	173
Supplementary data for a model-based health economic evaluation on lung cancer screening with low-dose computed tomography in a high-risk population <i>Data in brief, 2020, 31: 105999</i>	199
Chapter 8 Cost-effectiveness of lung cancer screening by low-dose CT in China: a micro-simulation study <i>Submitted</i>	207
Chapter 9 Lung cancer screening with low-dose CT: simulating the effect of starting screening at a younger age in women <i>Submitted</i>	227
Chapter 10 General discussion	245
Appendices Nederlandse samenvatting	256
Research Institute SHARE	259
List of publications	262
