Data Science for Infection Management & Antimicrobial Stewardship

Christian Friedemann Luz

This project has received funding from the European Union's Horizon 2020 re-search and innovation programme under the Marie Skłodowska-Curie Actions grant agreement no. 713660-PRONKJEWAIL-H2020-MSCA-COFUND-2015.

Printing of this thesis was financially supported by the Graduate School of Medical Sciences, University of Groningen, University Medical Center Groningen and the University of Groningen Library. This support is greatly appreciated.

Data Science for Infection Management & Antimicrobial Stewardship

PhD Thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday, 22nd November 2021 at 14:30 hours

by

Christian Friedemann Luz

born on 05 December 1988
in Baden-Baden, Germany

Supervisor

Prof. B.N.M. Sinha

Co-supervisors

Dr. C. Glasner

Dr. M.W.N. Nijsten

Assessment committee

Prof. P.H.J. van der Voort

Prof. A. Egli

Prof. K. Mouridsen

Paranymphs

Xaver Kahle

Matthijs Berends

Contents

1	Introduction	9
Part I	Antimicrobial Resistance and Stewardship	29
2	Mapping Twenty Years of Antimicrobial Resistance Research Trends <i>bioRxiv 2021.03.01.433375 (preprint)</i>	31
3	Diagnostic stewardship: Sense or nonsense?! <i>Nederlands Tijdschrift voor Medische Microbiologie 2018 Volume 26, Issue 3, Pages 169-177</i>	61
Part II	Working with data in infection management and antimicrobial stewardship	79
4	AMR – An R Package for Working with Antimicrobial Resistance Data <i>Accepted in Journal of Statistical Software</i>	81
5	Trends in Occurrence and Phenotypic Resistance of Coagulase-Negative Staphylococci (CoNS) Found in Blood in the Northern Netherlands between 2013 and 2019 <i>In preparation</i>	117
6	Introducing a New, Free, and Independent Method for Standardised, Reproducible, and Reliable Analyses of Antimicrobial Resistance Data <i>In preparation</i>	145
Part III	Data visualization to improve infection management and antimicrobial stewardship	157
7	The Visual Dictionary of Antimicrobial Stewardship, Infection Control, and Institutional Surveillance <i>bioRxiv 2021.05.19.444819 (preprint)</i>	159

8	Rapid Analysis of Diagnostic and Antimicrobial Patterns in R (RadaR): Interactive Open-Source Software App for Infection Management and Antimicrobial Stewardship	185
	<i>Journal of Medical Internet Research 2019</i> <i>Volume 21, Issue 6, e12843</i>	
9	Better Antimicrobial Resistance Data Analysis & Reporting in Less Time	207
	<i>In preparation</i>	
Part IV	Data modelling and prediction to improve infection management and antimicrobial stewardship	227
10	Machine learning in infection management using routine electronic health records: tools, techniques, and reporting of future technologies	229
	<i>Clinical Microbiology and Infection 2020</i> <i>Volume 26, Issue 10, P1291-1299</i>	
11	Time-Specific Metalearners for the Early Prediction of Sepsis	253
	<i>Computing in Cardiology (CinC) 2019</i> <i>Volume 46, Pages 1-4</i>	
12	Predicting Infection-related Consultations on Intensive Care Units – Development of a Machine Learning Prediction Model	265
	<i>medRxiv 2021.03.31.21254530 (preprint)</i>	
13	Summary and discussion	287
	Nederlandse samenvatting	305
	Acknowledgements	315
