The nature and evolution of humoral immune responses to influenza virus

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 17 November 2021 at 11.00 hours

by

Federica Sicca

born on 8 March 1992
in Pinerolo, Italy

Supervisors

Prof. A.L.W. Huckriede

Prof. E. Hak

Assessment Committee

Prof. G.F. Rimmelzwaan

Prof. D. van Baarle

Prof. N.A. Bos

Table of contents

Chapter 1

General introduction and scope of the thesis

Chapter 2

Effector mechanisms of influenza-specific antibodies: neutralization and beyond

Chapter 3

Comparison of influenza-specific neutralizing antibody titers determined using different assay readouts and hemagglutination inhibition titers: good correlation but poor agreement

Chapter 4

The evolution of humoral immune responses to past and novel influenza virus strains gives evidence for Antigenic Seniority

Chapter 5

Cross-protective immune responses induced by sequential influenza virus infection and by sequential vaccination with inactivated influenza vaccines

Chapter 6

Summarizing discussion
