**rijksuniversiteit
 groningen**

Sex differences and atrial fibrillation in heart failure with reduced versus preserved ejection fraction

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 24 november 2021 om 14.30 uur

door

Baukje Trientje Santema

geboren op 13 mei 1991
te Groningen

Promotores

Prof. dr. A.A. Voors

Prof. dr. C.S.P. Lam

Prof. dr. P. van der Meer

Beoordelingscommissie

Prof. dr. R.A. de Boer

Prof. dr. B.J.M. Mulder

Prof. dr. J.A. Ezekowitz

Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged. The research described in this thesis was supported by a personal grant of the Dutch Heart Foundation (DHF 2019T094).

TABLE OF CONTENTS

Chapter 1	Introduction and aims	9
Chapter 2	Heart failure in women: risk across a women's adult life <i>Journal of Cardiac Failure 2017</i>	23
Chapter 3	Identifying optimal doses of heart failure medications in men compared with women <i>Lancet 2019</i>	31
Chapter 4	Non-adherence to heart failure medication in men and women <i>Submitted</i>	75
Chapter 5	The influence of atrial fibrillation on the levels of NT-proBNP versus GDF-15 in patients with heart failure <i>Clinical Research in Cardiology 2020</i>	87
Chapter 6	Comparing biomarker profiles of patients with heart failure: atrial fibrillation versus sinus rhythm and reduced versus preserved ejection fraction <i>European Heart Journal 2018</i>	105
Chapter 7	Pathophysiological pathways in patients with heart failure and atrial fibrillation <i>Cardiovascular Research 2021</i>	139
Chapter 8	Genetic risk and atrial fibrillation in patients with heart failure <i>European Journal of Heart Failure 2020</i>	173
Chapter 9	General discussion and future perspectives	197
