Exploring Molecular Chirality Transfer

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 13 December 2021 at 9.00 hours

by

Anirban Mondal

born on 19 July 1992
in Kolkata, India

Supervisors

Prof. B.L. Feringa

Prof. S. Harutyunyan

Assessment Committee

Prof. E. Otten

Prof. A.J. Minnaard

Prof. M.A. Fernandez Ibanez

*I would like to dedicate my thesis to my dear mother Smt.
Shyamali Mondal.*

আমি আমার থিসিসটি আমার প্রিয় মা শ্রীমতি শ্যামলী মন্ডলকে উৎসর্গ করতে চাই.

Table of Content

Chapter 1

Recent Advances in Chemically Driven Rotatory Molecular Machines	1
1.1 Introduction	3
1.2. Chemically driven molecular switches	6
1.3. Controlling the speed of molecular rotors.....	19
1.4. Design and function of biaryl-based molecular motors.....	25
1.5. Molecular motors driven by chemical energy.....	34
1.6. Conclusion and prospective.....	38
1.7 Outline of the thesis	42
1.8. References.....	45

Chapter 2

P-chirogenic phosphinate controlled unidirectional 180° Caryl-Caryl bond rotation of an axially chiral biaryl	53
2.1 Introduction	55
2.2 Concept and design	57
2.3 Result and discussion	59
2.3.1 Synthesis	59
2.3.2 First 180° rotational cycle.....	60
2.3.3 Attempt towards final rotational cycle	63
2.4 Conclusion.....	65
2.5 Experimental section.....	67
2.6 Failed approaches	73
2.7 Reference.....	74

Chapter 3

Towards the design of a single metal catalysed chemically driven molecular motor	77
3.1 Introduction	79
3.2 Concept and design	82
3.3 Result and discussion.....	84

3.3.1 Synthesis	84
3.3.2 First rotational cycle	85
3.3.3 Second rotational cycle	88
3.4 Conclusion.....	92
3.5 Experimental details.....	93
3.6 X-Ray Data.....	105
3.7 References.....	106

Chapter 4

Pd-Catalyzed sp-sp³ Cross-Coupling of Benzyl bromides using Lithium Acetylides.....

4.1 Introduction	111
4.2 Results and discussion.....	112
4.2.1 Optimisation of the reaction condition	112
4.2.2 Scope of the reaction.....	114
4.3 Conclusion.....	118
4.4 Experimental section.....	119
4.6 Explanatory note: Proposed mechanism	135
4.7 References.....	137

Chapter 5

Synthesis and Functionalization of Allenes by Direct Pd Catalysed Organolithium Cross-Coupling

5.1 Introduction	143
5.2 Results and Discussion	144
5.2.1 Optimization for the direct arylation of tetrasubstituted allenylithium	144
5.2.2 Scope for the synthesis of tetrasubstitued allenes	145
5.2.3 Challenges in the synthesis of trisubstituted allenes	147
5.2.4 Attempt towards the direct synthesis of trisubstituted allenes from alkynes	148
5.3 Preliminary mechanistic studies	151
5.4 Application.....	155

5.5 Conclusion.....	157
5.6 Experimental Section	158
5.7 References.....	184

Chapter 6

P-Chirogenic Phosphorus Compounds by Stereoselective Pd-Catalysed Arylation of Phosphoramidites.....	189
6.1 Introduction	191
6.2 Result and discussion	193
6.2.1 Optimization of the asymmetric C–P coupling.....	193
6.2.1 Scope of aryl bromide and functional group tolerance.....	195
6.3 Preliminary mechanistic studies	198
6.4 Application.....	200
6.5 Conclusions.....	206
6.6 Experimental section.....	207
6.7 Limitations of the reported method.....	264
6.8 Explanatory Note 1.....	265
6.9 Reference.....	267

Chapter 7

Diastereoselective β-C–H activation of amines using P(III) as directing group.....	273
7.1 Introduction	275
7.2 Result and discussion.....	277
7.3 Scope	283
7.4 Proposed mechanism	285
7.5 Conclusion and outlook.....	286
7.6 Acknowledgement.....	287
7.7 Experimental section.....	287
7.8 Failed reactions.....	294
7.9 References.....	296

Chapter 8	
Summary	301
8.1 English summary.....	302
8.2 Nederlands Samenvatting	306

Acknowledgement.....	311
