Fighting infections with light

Targeted antimicrobial photodynamic therapy

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 15 December 2021 at 9.00 hours

by

Mafalda Alves Fernandes Bispo

born on 19 August 1992
in Matosinhos, Portugal

Supervisors

Prof. J.M. van Dijl

Prof. G.M. van Dam

Prof. W.C. Szymanski

Co-supervisors

Dr. G. Buist

Assessment Committee

Prof. A.J.M. Driessen

Prof. Y. Ren

Prof. S.K. Jain

Paranymphs

Ana Rita Ferreira

Lisanne Braams

Marjolein Heuker

The work described in this thesis was mainly performed in the Laboratory of Molecular Bacteriology, Department of Medical Microbiology of the University of Groningen and the University Medical Center Groningen (The Netherlands). The research described in this thesis was financially supported by the EU Horizon 2020 Programme under the Marie Skłodowska-Curie grant agreement 713660 (Pronkjewail) and the University Medical Center Groningen.

Table of contents

Chapter 1	General introduction and scope of the thesis <i>Contains part of a book chapter in Press in: Molecular Photoswitches, 2nd edition, Wiley (2021): "Molecular photoswitches in antimicrobial photopharmacology."</i>	8
Chapter 2	A facile and reproducible synthesis of NIR-fluorescent conjugates with small targeting molecules for microbial infection imaging <i>ACS Omega 2020; 5(35):22071-22080</i>	24
Chapter 3	Targeted antimicrobial therapy of resistant Gram-positive bacteria with a photo-activatable vancomycin-phthalocyanine conjugate <i>To be submitted for publication</i>	54
Chapter 4	Fighting <i>Staphylococcus aureus</i> infections with light and photo-immunoconjugates <i>JCI Insight. 2020; 5(22):e139512</i>	84
Chapter 5	Empowering antimicrobial photodynamic therapy of <i>Staphylococcus aureus</i> infections with potassium iodide <i>Photochem. Photobiol. 2021;225:112334</i>	120
Chapter 6	<i>Staphylococcus aureus</i> exposure and elimination with a fully human Protein A-specific monoclonal antibody <i>Under submission for publication</i>	144
Chapter 7	Targeted antimicrobial photodynamic therapy of biofilm-embedded and intracellular staphylococci with a phage endolysin's cell binding domain <i>Under submission for publication</i>	178
Chapter 8	Summary, discussion and conclusion	202
Chapter 9	Nederlandse samenvatting, discussie en conclusie Sumário e discussão List of publications Biography Acknowledgements- Agradecimentos	218
