Development of PET tracers for M2-macrophages

Bruna Fernandes

The research reported in this thesis was carried out within the Department of Nuclear Medicine and Molecular Imaging of the University Medical Center Groningen, in collaboration with the Biomedical Gerontology Graduate School at the Pontifical Catholic University of Rio Grande do Sul.

The reported research contained in this thesis was financially supported by a scholarship from the Graduate School of Medical Sciences (Abel Tasman Talent Program) of the University Medical Center Groningen and from *Coordenação de Aperfeiçoamento de Pessoal de Nível Superior (CAPES)*, Brazil.

Printing of this thesis was financially supported by the University Medical Center Groningen, and the research school of Kolff.

Development of PET tracers for M2-macrophages

PhD Thesis

to obtain the degree of PhD of the
University of Groningen
on the authority of the
Rector Magnificus Prof. C.Wijmenga
and in accordance with
the decision by the College of Deans

and

to obtain the degree of Doctor of Biomedical Gerontology of the
Pontifical Catholic University of Rio Grande do Sul
on the authority of the
Rector Magnificus Prof. Evilázio Teixeira
and in the accordance with
the decision by the College of Deans.

Double PhD degree

This thesis will be defended in public on
Monday 20 December 2021 at 9:00 hours

by

Bruna Fernandes

born on 13 February of 1989
in Curitiba, Brazil

Supervisors

Prof. P.H. Elsinga

Prof. E.F.J de Vries

Co-supervisors

Dr. I.F. Antunes

Dr. C.M. Moriguchi Jeckel

Assessment Committee

Prof. M.N. Lub-de Hooge

Prof. W. Helfrich

Prof. A.W.J.M. Glaudemans

Prof. M.E. Bauer

Paranymphs

Drs. Ligia Akemi Kiyuna

Dr. Paula Kopschina Feltes

Table of contents

CHAPTER 1

General introduction	9
----------------------	---

CHAPTER 2

Tumor-associated macrophages as targets for treatment monitoring through positron emission tomography	27
---	----

CHAPTER 3

Anti-inflammatory activity of the CD163-mimic peptide CTHRSSVVC and its biological behavior	51
---	----

CHAPTER 4

Synthesis and preclinical evaluation of [^{18}F]AIF-NODA-MP-C6-CTHRSSVVC as a PET tracer for CD163-positive tumor-infiltrating macrophages	71
---	----

CHAPTER 5

Automated radiosynthesis of the arginase inhibitor [^{18}F]FBMARS via Cu-mediated oxidative ^{18}F -radiofluorination	99
---	----

CHAPTER 6

Quantification of arginase expression with [^{18}F]FBMARS PET in a macrophage xenograft rat model: a pharmacokinetic modeling study	113
--	-----

CHAPTER 7

Discussion and future perspectives	131
------------------------------------	-----

CHAPTER 8

Summary	145
---------	-----

CHAPTER 9

Samenvatting	151
--------------	-----

CHAPTER 10

Resumo	159
--------	-----

CHAPTER 11

Acknowledgment/agradecimientos	167
--------------------------------	-----
