Innate and B cell-dependent immune responses to dengue infection

Vinit Upasani

The research presented in this thesis was conducted at the Immunology Unit at Institut Pasteur Cambodia, Phnom Penh, Cambodia and the Department of Medical Microbiology and Infection Prevention of the University Medical Center Groningen within the Groningen University Institute for Drug Exploration (GUIDE), University of Groningen, Groningen, the Netherlands.

Innate and B cell-dependent immune responses to dengue virus infection

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 22 December 2021 at 16:15 hours

by

Vinit Upasani

born on 2 June 1992
in Pune, India

Supervisor

Prof. dr. J.M. Smit

Co-supervisors

Dr. I.A. Rodenhuis-Zybert

Dr. T. Cantaert

Assessment committee

Prof. dr. N. A. Bos

Prof. dr. L.C. Ferreira

Prof. dr. H. Wertheim

Paranymphs

Bram M. ter Ellen

Virendrasinh Khandare

Table of contents

Chapter 1	9
<hr/>	
Introduction and scope of the thesis	
Chapter 2	41
<hr/>	
TLR2 on blood monocytes senses dengue virus infection and its expression correlates with disease pathogenesis	
Chapter 3	101
<hr/>	
Characterization of soluble TLR2 and CD14 levels during acute dengue virus infection	
Chapter 4	123
<hr/>	
Decreased type I interferon production by plasmacytoid dendritic cells contributes to severe dengue	
Chapter 5	161
<hr/>	
Impaired antibody-independent immune response of B cells in patients with acute dengue infection	
Chapter 6	195
<hr/>	
Direct Infection of B Cells by Dengue Virus Modulates B Cell Responses in a Cambodian Pediatric Cohort	
Chapter 7	235
<hr/>	
Summarizing discussion	
I. Dual role of innate sentinel cells during dengue infection	
II. Antibody-independent functions of B cells during viral infections	
Appendix	297
<hr/>	
Nederlandse samenvatting	298
Acknowledgements	302
Curriculum vitae	305
