Tricking the gatekeepers:
subversion of host immune responses by
Porphyromonas gingivalis

Marines du Teil Espina

The research described in this thesis was conducted at the Molecular Bacteriology laboratory at the Department of Medical Microbiology of the University Medical Center Groningen and the University of Groningen, the Netherlands.

This research was funded by the Graduate School of Medical Sciences of the University of Groningen.

Printing of this thesis was financially supported by the Graduate School of Medical Sciences of the University of Groningen and Groningen University Library.

ISBN: 978-94-6421-609-7

Cover: Watercolor painting of the neutrophil wall and *P. gingivalis*

Printed by : Ipskamp Printing, Amsterdam.

Tricking the gatekeepers: subversion of host immune responses by *Porphyromonas gingivalis*

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on
Monday 17 January 2022 at 12.45 hours

by

Marines Du Teil Espina

born on 12 February 1990
in Guatemala

Supervisors

Prof. J.M. van Dijl
Prof. F.M. Reggiori

Co-supervisor

Dr. J. Westra

Assessment Committee

Prof. A. Vissink
Prof. M. Schmidt
Prof. M. Curtis

Table of Contents

Chapter 1 : General Introduction and Scope of the Thesis	11
Chapter 2 : ‘Talk to your gut’: the oral-gut microbiome axis and its immunomodulatory role in the etiology of rheumatoid arthritis - <i>FEMS Microbiology Reviews</i>, 2018, 43(1):1-18.	23
Chapter 3 : ‘There's no place like OM’: Vesicular sorting and secretion of the peptidylarginine deiminase of <i>Porphyromonas gingivalis</i> - <i>Virulence</i>, 2018, 9(1):456-464.	59
Chapter 4: A secreted bacterial peptidylarginine deiminase can neutralize human innate immune defenses – <i>mBio</i>, 2018, 9(5):e01704-18.	77
Chapter 5: Proteomic profiling of outer membrane vesicles of <i>Porphyromonas gingivalis</i> – to be submitted to the <i>Journal of Proteome Research</i>	105
Chapter 6: Coating and corruption of human neutrophils by bacterial outer membrane vesicles – to be resubmitted to <i>Nature Microbiology</i>	147
Chapter 7: Discussion and future perspectives	175
Appendix	185
Nederlandse samenvatting	186
