**Extraction, characterization and biological effects of
polysaccharides from marine (micro)algae**

Tatiana Rojo Moro

The studies described in this thesis were performed within the framework of Molecular Pharmacology Department of University of Groningen (RUG) and Postgraduate Program in Sciences (Biochemistry), Sector of Biological Sciences of Federal University of Paraná (UFPR). It was partially supported by Coordenação de Aperfeiçoamento de Pessoal de Nível Superior (CAPES) grants and scholarships number 88882.344138/2019-01, and CAPES PrInt program number 88887.468902/2019-00.

Printing of this thesis was financially supported by: University Library and Graduate School of Science and Engineering (GSSE).

Extraction, characterization and biological effects of polysaccharides from marine (micro)algae

PhD Thesis

to obtain the degree of PhD at the University of Groningen
on the authority of the Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans.

and

to obtain the degree of PhD at
Universidade Federal do Paraná
on the authority of the Rector Magnificus
Prof. R. M. Fonseca
and in accordance with
the decision by the College of Deans.

Double PhD degree

This thesis will be defended in public on
Monday 10 January 2022 at 14:30 hours

by

Tatiana Moro

born on 13 August 1991
in Curitiba, Paraná, Brazil

Supervisors

Prof. A.M. Dolga

Prof. M.D. Nosedá

Co-supervisors

Dr. M.E.D. Nosedá

Dr. S.M.B. Winnischofer

Assessment committee

Prof. M. Schmidt

Prof. A.S.S. Dömling

Prof. A.J. Moshage

Prof. A.G. Gonçalves

Table of content

Chapter 1 – General introduction	9
Chapter 2 – Marine Microalgae Biomolecules and Their Adhesion Capacity to <i>Ucro qpgmc "gpvgt kcc sv. Typhimurium Crrnkgf "Uekgpegu."</i> 32."445; "*"4242+"	32
Chapter 3 – Chemical structure and biological activity of the β-D-glucan (1→3)-linked isolated from marine diatom <i>Eqpvket kdt c 'y gkuurqi kk</i>	65
Chapter 4 – (1→6, 1→3)-β-D-glucan isolated from microalgae <i>Kuqej t {uku"i cnlcpc</i> decreases the mitochondrial activity of human glioblastoma cell lines	97
Chapter 5 – Mitochondrial effects of an oversulfated heterorhamman from <i>I c {t crkc "dt c ukkgpuku</i> in glioblastoma cell lines	143
Chapter 6 – General discussion and main conclusions	167
