DECIPHERING CELLULAR HETEROGENEITY of the BRAIN

Implications for neurodegenerative diseases

Emma Gerrits

The research presented in this thesis was conducted at the Department of Biomedical Sciences of Cells and Systems, section Molecular Neurobiology, University of Groningen, University Medical Center Groningen, the Netherlands.

The work presented in this thesis was financially supported by Stichting MS Research, AbbVie Inc., Alzheimer Nederland and ZonMw. Printing of this thesis was financially supported by the University of Groningen, University Medical Center Groningen, the Graduate School of Medical Sciences and the Research School of Behavioural and Cognitive Neurosciences.

Cover design and layout: Emma Gerrits

The book cover and chapters represent how different experimental data come together to solve the puzzle of understanding the human brain. The colors represent heterogeneity and diversity of brain cells.

Printing: Ridderprint | www.ridderprint.nl

This thesis was printed on FSC-certified recycled paper.

Deciphering cellular heterogeneity of the brain

Implications for neurodegenerative diseases

Proefschrift

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen
 op gezag van de
 rector magnificus prof. dr. C. Wijmenga
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op
 7 februari 2022 om 12:45 uur

door

Emma Gerrits

geboren op 6 juni 1994
 te Zwolle

Promotores

Contents

Chapter 1: General introduction and outline of the thesis	9
<hr/>	
Neurons	
Oligodendrocytes	
Brain macrophages	
Astrocytes	
Neurovasculature	
Chapter 2	51
<hr/>	
Brain macrophages acquire distinct transcriptomes in multiple sclerosis lesions and normal appearing white matter	
Chapter 3	81
<hr/>	
Single-nucleus RNA-sequencing of microglia as a proxy for the cellular transcriptome	
Chapter 4	99
<hr/>	
Distinct amyloid- β and tau-associated microglia profiles in Alzheimer's disease	
Chapter 5	133
<hr/>	
Neurovascular unit disruption underlies <i>GRN</i> -associated frontotemporal dementia	
Chapter 6: General discussion	175
<hr/>	
Cellular heterogeneity of the brain in neurodegenerative diseases	
Studying human postmortem brain tissues	
Reproducibility	
Technological advances	
Chapter 7: Appendices	197
<hr/>
