Intestinal oxygenation, growth, and development of preterm infants

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 2 februari 2022 om 14:30 uur

door

Baukje Margriet Dotinga

geboren op 7 oktober 1993
te Sneek

Promotores

Dr. E.M.W. Kooi

Prof. dr. A.F. Bos

Prof. dr. S.A. Reijneveld

Beoordelingscommissie

Prof. dr. H.J. Verkade

Prof. dr. J.B. van Goudoever

Prof. dr. M. Vento

Table of contents

Chapter 1	General introduction and outline of the thesis	7
Part I	Intestinal oxygenation: validation of splanchnic oxygen saturation monitoring	
Chapter 2	Maturation of intestinal oxygenation: A review of mechanisms and clinical implications for preterm neonates <i>Front Pediatr. 2020;8:354</i>	25
Chapter 3	Splanchnic oxygen saturation during reoxygenation with 21% or 100% O ₂ in newborn piglets <i>Pediatr Res. 2021. Online ahead of print</i>	57
Chapter 4	Gene expression in the intestine of newborn piglets after hypoxia-reoxygenation <i>Submitted</i>	77
Part II	Intestinal oxygenation: clinical application of splanchnic oxygen saturation monitoring	
Chapter 5	Regional splanchnic oxygen saturation for preterm infants in the first week after birth: reference values <i>Pediatr Res. 2021;90(4):882-887</i>	105
Chapter 6	Splanchnic oxygen saturation is not associated with early growth in very preterm infants <i>Submitted</i>	123
Part III	Growth and development	
Chapter 7	Longitudinal growth and neuropsychological functioning at age 7 in moderate and late preterms <i>Pediatrics. 2016;138(4):e20153638</i>	141
Chapter 8	Longitudinal growth and emotional and behavioral problems at age 7 in moderate and late preterms <i>PLoS One. 2019;14(1):e0211427</i>	161
Chapter 9	General discussion	179
Appendices	Summary in English	203
	Nederlandse samenvatting	206
	Abbreviations	210
	Dankwoord	214
	About the author	218
