DNAJB6 and its substrates: connecting the dots

Els Kuiper

The research described in this thesis was conducted at the Department of Biomedical Sciences of Cells & Systems, University of Groningen, University Medical Center Groningen, The Netherlands. The research in this thesis was supported by a Topmaster fellowship from the Groningen University Institute for Drug Exploration (GUIDE), and a grant from the Campagnetteam Huntington. Printing of this thesis was financially supported by the University of Groningen, the Graduate School of Medical Sciences, and the Research School of Behavioural and Cognitive Neurosciences (BCN) at University Medical Center Groningen.

Cover and chapter design: Els Kuiper - www.elskuiper.nl

Thesis layout: Els Kuiper - www.elskuiper.nl

Thesis printed by: Gildeprint - www.gildeprint.nl

Cover drawing of Rosalind Franklin by Elisa Shigehiro - www.elisashigehiro.com

Other drawings on cover and chapter pages: adapted from Clipart FCIT <https://etc.usf.edu/clipart>, with exception of drawing of nuclear envelope with NPCs: adapted from Mazzanti et al., *Physiological Reviews*, 2001. Chapter page of chapter 5, NPC top view: adapted from Bloom and Fawcett, *A Textbook of Histology*, 1994. Chapter page of the Dutch summary: adapted from Lego toy US patent application.

DNAJB6 and its substrates: connecting the dots

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

maandag 28 februari 2022 om 16.15 uur

door

Engelina Foelke Elsiena Kuiper

geboren op 6 februari 1984
te Nieuweschans

Supervisor

Prof. dr. H.H. Kampinga

Co-supervisor

Dr. S. Bergink

Assessment committee

Prof. dr. ir. E.A.A. Nollen

Prof. dr. B. Poolman

Prof. dr. ir. S.J. Tans

Dr. C. Schlieker (advisory member)

Paranymphs

Despina Serlidaki

Maiara Kolbe Musskopf

Table of Contents

Chapter 1	Aim and outline of the thesis	10
Chapter 2	The molecular chaperone DNAJB6 in cellular physiology and disease: an introduction	14
Chapter 3	Versatile members of the DNAJ family show Hsp70 dependent anti-aggregation activity on RING1 mutant parkin C289G	38
Chapter 4	Chaperones in polyglutamine aggregation: beyond the Q ₅ -stretch	66
Chapter 5	The molecular chaperone DNAJB6 provides surveillance of FG-Nups and is required for interphase nuclear pore complex biogenesis	86
Chapter 6	DNAJB6 and its substrates: connecting the dots. A general discussion and future perspectives	138
Appendices	I. Nederlandse Samenvatting	164
	II. Short CV with List of publications	174
	III. Acknowledgements / Dankwoord	180
