Genetics of radiation-induced toxicities in cancer patients

Elnaz Naderi

The research described in this dissertation was carried out at the department of Radiation Oncology and Epidemiology at the university medical center Groningen. E. Naderi received a Ph.D. scholarship of the University of Groningen.

Printing of this thesis was financially supported by the university of Groningen (RUG), the university Medical Center Groningen (UMCG), the Graduate School of Medical Science (GSMS), and the Groningen University Institute for Drug Exploration (GUIDE).

Genetics of radiation-induced toxicities in cancer patients

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. C. Wijmenga
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Thursday 24 February 2022 at 16.15 hours

by

Elnaz Naderi

born on 8 March 1987
 in Kermanshah, Iran

Supervisors

Prof. J.A. Langendijk

†Prof. H.M. Boezen

Co-supervisor

Dr. B.Z. Alizadeh

Assessment Committee

Prof. S.M. Leal

Prof. M.A.T.M. van Vugt

Prof. R.P. Coppes

Paranymphs

Table of contents

page

Chapter 1	General introduction	9
Chapter 2	A two-stage genome-wide association study of radiation-induced acute toxicity in head and neck cancer	17
Chapter 3	A genome wide association study of radiotherapy-induced toxicity in head and neck cancer patients identifies a susceptibility locus associated with mucositis	35
Chapter 4	Genome-wide association analysis using multiple phenotype imputed datasets: demonstration and pitfalls	55
Chapter 5	Meta-GWAS to identify genetic susceptibility across radiation-induced acute toxicities in head and neck cancer	67
Chapter 6	Pan-cancer meta-GWAS to identify shared genetic susceptibility across radiation-induced acute toxicities	99
Chapter 7	Summary, general discussion, and suggestions for future research	117
Chapter 8	Nederlands samenvatting About the author List of publications Acknowledgment	133
