If you believe that this document breaches copyright please contact us providing details, and we will remove access to the work immediately and investigate your claim.

Downloaded from the University of Groningen/UMCG research database (Pure): <http://www.rug.nl/research/portal>. For technical reasons the number of authors shown on this cover page is limited to 10 maximum.

An abstract geometric network diagram composed of various sized circles (nodes) connected by solid and dashed lines. The nodes are arranged in a non-uniform, interconnected pattern across the page. Some nodes are solid gray, while others are hollow white with gray outlines. The lines connecting them are thin and light gray, creating a complex web-like structure that frames the central text.

BOUNDARIES AS OPPORTUNITIES

A multilevel investigation of resilience
