Baryon-number violation in chiral effective field theory

Femke Oosterhof

university of
 groningen

This work was carried out at the Van Swinderen Institute for Particle Physics and Gravity at the University of Groningen. It originates as part of the research programme of the Foundation for Fundamental Research on Matter (FOM), and falls as of April 1, 2017 under the responsibility of Foundation for Nederlandse Wetenschappelijk Onderzoek Instituten (NWO-I), which is part of the Dutch Research Council (NWO).

Cover photo: Durk Oosterhof

Cover design: Ahmad Shahabeddin Parizi, Femke Oosterhof

Layout: Jorrit Oosterhof, Ahmad Shahabeddin Parizi, Femke Oosterhof

Printed by: ProefschriftMaken

Title pages of the chapters designed by Ahmad Shahabeddin Parizi; inspired by the desert dunes near Yazd, Iran.

rijksuniversiteit
 groningen

Baryon-number violation in chiral effective field theory

Proefschrift

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen
 op gezag van de
 rector magnificus prof. dr. C. Wijmenga
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

dinsdag 15 maart 2022 om 16.15 uur

door

Femke Oosterhof

geboren op 25 maart 1992
 te Smallerland

Promotores

Prof. dr. R.G.E. Timmermans

Prof. dr. U. van Kolck

Beoordelingscommissie

Prof. dr. ir. R.A. Hoekstra

Prof. dr. S.P. Fleming

Prof. dr. R.P. Springer

Contents

Chapter 1	
Introduction	7
Chapter 2	
Baryon-number violation by two units in chiral effective field theory	13
2.1 Dimension-nine six-quark operators	15
2.2 The chiral Lagrangian density	20
2.3 Neutron-antineutron oscillations	29
2.4 $ \Delta B = 2$ violation in the two-(anti)nucleon sector	36
2.5 NN and $N\bar{N}$ interactions using perturbative pions	40
Appendices	
2.A C , P , and T transformations	52
2.B Fierz transformations	52
2.C $SU(3)$ tensor algebra	55
Chapter 3	
Baryon-number violation by two units and the deuteron lifetime	61
Chapter 4	
Nucleon decay violating baryon number by one unit in chiral effective field theory	73
4.1 Introduction	75
4.2 Dimension-six operators	75
4.3 Chiral effective field theory	76
4.4 $\Delta B = 1$ nucleon-decay Lagrangian density in χ EFT	77
4.5 Proton and neutron decay rate	80
Appendices	
4.A Construction chiral operators	86
4.B LECs in the chiral Lagrangian density describing $ \Delta B = 1$ physics	96
4.C Redefinition of constants to absorb divergences	101
Chapter 5	
Nucleon decay in the deuteron	103
Chapter 6	
Summary and outlook	115
Bibliography	121
Nederlandse samenvatting	127
Acknowledgments	131
About the author	133
List of publications	135
