Functionalization of Halloysite Nanotubes for Environmental and Drug Delivery Applications

Hamoon Hemmatpour

The work presented in this thesis was performed at the Department of Polymer Engineering of Amirkabir University of Technology (Iran) and the Surfaces and Thin Films Group (Zernike Institute for Advanced Materials) of the University of Groningen (the Netherlands). The author was financially supported by a PhD scholarship grant from the Ubbo Emmius programme at University of Groningen during PhD studies at the Zernike Institute for Advanced Materials.

Front cover: A 3D illustration of dopamine molecule, Back cover: A schematic representation of Tehran city. Both retrieved from Shutterstock database.

AMIRKABIR
University of Technology

Functionalization of Halloysite Nanotubes for Environmental and Drug Delivery Applications

PhD Thesis

to obtain the degree of PhD of the University of Groningen
on the authority of the Rector Magnificus Prof. C.
Wijmenga and in accordance with the decision by the
College of Deans

and

to obtain the degree of PhD of the Amirkabir University
of Technology on the authority of the Rector Dr. S. H.
Ghodsypour and in accordance with the decision of the
General Meeting of the Department of Polymer and
Colour Engineering

Double PhD degree

This thesis will be defended in public on

Tuesday 15 March 2022 at 11:00 hours

by

Hamoon Hemmatpour

born on 07 February 1990

in Kermanshah, Iran

Supervisors

Prof. P. Rudolf

Prof. V. Haddadi-Asl

Assessment committee

Prof. M.M.G. Kamperman

Prof. F. Picchioni

Prof. N. Mohammadi

Prof. A. Avgeropoulos

Table of Contents

Chapter 1

General Introduction.....	1
1.1 Introduction to clay minerals.....	2
1.2 Halloysite clay minerals	4
1.2.1 Geological occurrence	6
1.2.2 Structure and morphology	7
1.2.3 Applications in water remediation	8
1.2.4 Applications in drug delivery	8
1.2.5 Surface modification	10
1.2.5.1 Polydopamine surface modification.....	11
1.2.5.2 Surface polymer grafting.....	12
1.2.5.2.1 Surface initiated atom transfer radical polymerization	14
1.3 Thesis Outline	15
1.4 References	18

Chapter 2

Experimental details	25
2.1 Materials and experimental protocols	26
2.1.1 Materials.....	26
2.1.2 Preparation of polydopamine aggregates (project delineated in Chapter 3).....	27
2.1.3 Modification of HNTs with polydopamine (projects presented in Chapters 3, 4, 5 and 6).....	28
2.1.4 Polydopamine coating of a silicon substrate (project described in Chapter 3).....	28

2.1.5 Methylene blue adsorption experiments (project detailed in Chapter 4)	29
2.1.6 Attachment of the ATRP initiator to the polydopamine-coated HNTs (projects presented in Chapters 5 and 6).....	30
2.1.7 Grafting of pH-responsive brushes to HNTs surface (research detailed in Chapter 5).....	31
2.1.8 Grafting of temperature-responsive brushes to HNTs surface (project described in Chapter 6)	31
2.1.9 Grafting of poly(isopropyl acrylamide <i>co</i> propargyl acrylate) brushes to HNTs surface (project detailed in Chapter 6).....	32
2.1.10 Labelling of modified HNTs with fluorescent molecules (research described in Chapter 6)	33
2.1.11 Drug loading of HNTs (research presented in Chapters 5 and 6)..	34
2.1.12 pH-responsive drug release studies (project detailed in Chapter 5)	35
2.1.13 Temperature-responsive drug release studies (research presented in Chapter 6).....	35
2.1.14 Cell viability studies (project detailed in Chapter 6)	36
2.1.15 Cellular uptake studies (study described in Chapter 6).....	37
2.1.15.1 Cell culture	37
2.1.15.2 Cell seeding and F-HNIP-PPA incubation.....	37
2.1.15.3 Live-cell labelling	38
2.1.15.4 STED nanoscopy.....	38
2.1.15.5 Dissolving F-HNIP-PPA and minimizing aggregates	39
2.1.15.6 Comparing fluorescence spectra for Abberior STAR 635 and F-HNIP-PPA	40
2.1.15.7 Quantifying cellular uptake of F-HNIP-PPA.....	40
2.2 Characterization techniques	41
2.2.1 Dynamic light scattering and Zeta potential analysis	41

2.2.2 Thermogravimetric analysis	42
2.2.3 Fourier transform infrared spectroscopy	42
2.2.4 Porosity measurements.....	42
2.2.5 Scanning electron microscopy and energy dispersive X-ray spectroscopy	43
2.2.6 Transmission electron microscopy	43
2.2.7 X-ray photoelectron spectroscopy	44
2.2.8 X-ray diffraction analysis.....	44
2.2.9 Solid state nuclear magnetic resonance.....	45
2.2.10 Solution nuclear magnetic resonance	45
2.2.11 Fluorimetry analysis	46
2.2.12 UV-visible spectroscopy	46
2.3 References	47

Chapter 3

New insights in the polydopamine formation via surface adsorption	49
3.1 Introduction	50
3.2 Results and discussion.....	54
3.2.1 Characterization of the halloysite nanotubes	54
3.2.2 Time evolution of polydopamine formation on halloysite nanotubes	56
3.2.3 Solid State ¹³ C nuclear magnetic resonance spectroscopy	63
3.2.4 XPS analysis.....	67
3.2.5 Towards a rational model for the formation of polydopamine	75
3.3 Conclusion.....	81
3.4 References	82

Chapter 4

Methylene blue adsorption on polydopamine-modified halloysite nanotubes.....87

4.1 Introduction.....	88
4.2 Results and discussion	91
4.2.1 Characterization of PDA-modified HNTs	91
4.2.2 Adsorption studies	95
4.2.2.1 Effects of pH on the MB adsorption	95
4.2.2.2 Adsorption kinetics	97
4.2.2.3 Adsorption isotherms	103
4.2.2.4 Mechanism of MB adsorption.....	107
4.3 Conclusion	111
4.4 References	112

Chapter 5

Grafting pH-responsive brushes onto halloysite nanotubes for loading and releasing doxorubicin..... .119

5.1 Introduction.....	120
5.2 Results and discussion	124
5.2.1 ATRP Initiator anchoring on the HNTs surface	125
5.2.2 Kinetic of ARGET-ATRP in the presence of HNTs.....	129
5.2.3 Chemical characterization of PDMAEMA-grafted HNTs.....	130
5.2.4 Morphology of PDMAEMA-grafted HNTs	133
5.2.5 pH-responsivity of PDMAEMA-grafted HNTs.....	134
5.2.6 Drug loading and release behaviour of HNT-PDMAEMA	135
5.3 Conclusion	137
5.6 References	139

Chapter 6

Temperature-responsive drug carrier based on halloysite nanotubes

.....	147
6.1 Introduction	148
6.2 Results and discussion.....	150
6.2.1 Characterization of PNIPAM-grafted HNTs.....	152
6.2.2 Doxorubicin loading and release.....	158
6.2.3 Cytocompatibility studies.....	161
6.2.4 Labelling of PNIPAM-grafted HNTs with a fluorescent molecule	164
6.2.5 Cellular uptake studies	166
6.3 Conclusion.....	173
6.4 Refences	174
Summary	179
Samenvatting.....	185
Acknowledgments.....	193
List of Publications.....	201
About the Author.....	202
