Curriculum Vitae

Maliheh Namazkhan (1986) completed her bachelor (BSc) in Statistics and Probability (2008) at PNU University of Gonbad, Iran. In 2013, she obtained her master (MSc) in Mathematical Statistics at Allameh Tabatabai University of Tehran, Iran. In 2017, she started her PhD at the Department of Psychometrics and Statistics at the Faculty of Behavioural and Social Sciences of the University of Groningen, supervised by Prof. dr. Casper Albers and Prof. dr. Linda Steg, funded by the Netherlands Enterprise Agency, as part of the TKI Urban Energy project ‘ENPREGA’. During her PhD project, she explored household energy consumption patterns to understand sustainable energy behaviour using a variety of statistical approaches that have hardly been used in the field of social sciences. She was also awarded the runner-up Snijders-Kouwer Article Prize (2020) for the paper that Chapter 2 of this thesis is based on. As of January 2022, she works as a postdoctoral researcher at the Department of Methodology and Statistics at Tilburg University.
Acknowledgements

I am deeply grateful to all of those in Groningen and beyond, who accompanied and supported me not only in the years throughout my PhD, but also in an important chapter of my life in many different ways.

First of all, my deepest appreciation and gratitude go to my two supervisors Casper Albers and Linda Steg. Thank you for being the top supportive supervisors I could wish for! I am so glad that you were there on my side, not just during the research process, but also during all the hard times of my PhD trajectory. I never forget your instant responses to any questions or concerns I had, even if it was the weekend, Christmas or summer break. I am deeply grateful to you for being so incredibly involved in all my projects and for giving me the freedom to explore new pathways. Casper, thank you for always patiently providing me with advice and tips, for always helping develop new ideas, and new techniques, and special thanks for the title suggestions and Dutch summary of my thesis. Linda, I would also like to express my gratitude for your positivity, your feedback, and your support. Most of all, thank you for caring for the well-being of your students. I particularly never forget our walking meetings last year that have helped me stay motivated to work and finalise my thesis.

I would especially like to thank my fantastic paranymphs Nemat and Fatemeh. Dear Nemat, it is a great honour to have your support and love beside me at this special moment. Thank you for your patience, especially during those more stressful moments in the end. I am deeply grateful to you for being there with me, always! Fatemeh, thank you for all your support and your excellent ideas for planning the defence. I will never forget all the good times that we had together over the years, our walk & talk, delicious foods, movie nights, and so much more.

I would also like to thank the members of the reading committee, prof. Rob Meijer, prof. Wouter Poortinga, and prof. Birgitta Gatersleben for taking the time to read and assess my dissertation.

Many thanks to my co-authors, Nitin and Lise. It was nice working with you!
I would like to thank my colleagues from the Psychometrics and Statistics Department at the University of Groningen. Particularly, Karin, you have not only been a great colleague but a wonderful friend. I thank you for all the time we spent together, all the walks, driving, and our interesting conversations about really everything. I never forget how much effort you put to teach me Dutch, it was just so much adorable and fun! Susan, thank you for your help and your special company on the very first day of taking me to the hospital. Your presence there literally warmed my heart! Lieke, your generosity and thoughtfulness were unbounded! Thank you for creating a nice working atmosphere. Mark and Sebastian, thank you for always being there when I was struggling with the R codes. Karin, Lieke, Mark, Soha, and Sajad, I am very grateful for all your support during my PhD, especially for helping me move to another place.

And the rest of my colleagues in the Psychometrics and Statistics Department: Daniela, Jasmine, Jorge, Jorien, Marieke, Henk, Hanny, Marvin, Max, Sarahanne, Anja, Merle, Joyce, Tom, Laura, Don, Edith, Iris. Thank you for the pleasant chats, advice, coffee meetings and other activities.

I am also thankful to all my other colleagues from the Environmental Psychology group for warmly welcoming me into the group and, for the fun lab meetings and open atmosphere. Thank you Anjela, Berfu, Ellen, Goda, Nadja C., Eliot, Nadja Z., Nieke, Thijs.

Special thanks also go to José, Karen, Froukje, and Peter who took the time to listen to me. This thesis would not be what it is without you. Thank you for all your support, inspiring, and motivating moments.

During this time, I met amazing friends who shared many beautiful experiences with me. Sara, thank you for being there for me and listening to me whenever I need to talk to you. We shared wonderful moments during our trips to Paris, Barcelona, and Athens. Afshin, thank you for being such a good friend to me, I will never forget your company and support. Thank you Faranak, Homayoun, Fereshteh, Shahin, Armin, and Sara, for travelling, laughing, and playing Mafia together. We share some unforgettable memories!

I thank my friends in Iran who just make life so fun. Hadis, Behnaz, Navisa, Salimeh, Zahra, Masoud, Marjan, Vajiheh, and Kimia. I will always cherish our friendships.
Finally, much appreciation goes to my family for always encouraging me to study and travel abroad. Maman, Baba, Mahla, and Mohsen, you have been a true blessing in my life. Thank you for your endless support and love. Without your heart-warming cordiality, I don’t think I would have gotten to this point.

My dear Mahmoud, thank you for always being with me in my heart.
