The author regrets that several Table numbering errors have occurred during the post-production process as a result of optimizing the space for publication purposes. Unfortunately, these numbering inconsistencies were not picked up during the final draft stage. Specifically, in Section 3.1 the reference should read Table 1 instead of Table 2; in Section 4 the correct reference for descriptive statistics is

Table 2 not Table 3; likewise, Table 3 not Table 4 includes the matrix of correlations. Finally, when discussing the main results of the paper (pag. 525 last paragraph, and pag. 526 second paragraph) the correct reference is Table 4 not Table 1. The author would like to apologise for any inconvenience caused.
