ISBN: 978-94-034-1990-9 (electronic version)

The work described in this thesis was performed in the research group Physics of Nanodevices of the Zernike Institute for Advanced Materials at the University of Groningen, the Netherlands. This work was supported by NanoLab NL and the Zernike Institute for Advanced Materials. This thesis is part of research program Magnon Spintronics financed by the Netherlands Organization for Scientific Research (NWO).

Controlled magnon spin transport in insulating magnets

From linear to nonlinear regimes

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 30 September 2019 at 9:00 hours

by

Jing Liu

born on 16 May 1991
in Hunan, China

Supervisor

Prof. B. J. van Wees

Co-supervisor

Prof. G. E. W. Bauer

Contents

1	Introduction	1
1.1	Magnetism	1
1.2	Magnetic excitation: Magnons or spin waves	2
1.3	Magnon spintronics	3
1.4	A gem: Yttrium iron garnet (YIG)	3
1.5	Motivation and thesis outline	4
	Bibliography	5
2	Theoretical background	7
2.1	Magnons and spin waves	7
2.2	Ferrimagnetic insulator: YIG	9
2.3	Magnon spectra	11
2.4	Magnon injection and detection	21
2.4.1	Spin injection and detection	21
2.4.2	(Inverse) spin Hall effect	24
2.4.3	Electrical method	27
2.4.4	Microwave method	30
2.5	Magnon transport theory	33
2.5.1	Nonlocal magnon transport set-up	33
2.5.2	Magnon chemical potential and spin diffusion equation	33
2.5.3	Energy-dependent magnon transport	35
2.5.4	From the linear to nonlinear response regime	35
2.5.5	Summary	36
	Bibliography	37

3	Experimental set-up and methods	41
3.1	Device Fabrication	41
3.1.1	Pt-YIG nonlocal device	42
3.1.2	Electron beam lithography (EBL)	43
3.2	Electrical generation and detection of magnons	46
3.2.1	Set-up	46
3.2.2	Lockin technique for nonlocal measurement	48
3.2.3	Typical results	49
3.3	Microwave excitation of magnons	51
3.3.1	Setup	52
3.3.2	Microwave reflection measurement	54
3.3.3	Spin pumping measurement	56
	Bibliography	57
4	Magnon planar Hall effect and anisotropic magnetoresistance in a magnetic insulator	59
4.1	Introduction	59
4.2	Experimental details	61
4.2.1	Devices	61
4.2.2	Measurement techniques	62
4.3	Results and discussion	64
4.4	Conclusions	67
4.5	Supplementary Material	67
4.5.1	Origin of the angle shift in the MPHE and MAMR measurement	67
4.5.2	Derivation for the magnitude of MPHE and MAMR signals	69
4.5.3	Double detector MPHE measurements	73
4.5.4	In-plane magnetocrystalline anisotropy of YIG (111)	73
4.5.5	Out-of-plane misalignment of the sample plane with respect to the applied magnetic field	77
4.5.6	Sign and magnitude of the MPHE and MAMR	82
4.5.7	Reciprocity and linearity of the MPHE and MAMR	85
	Bibliography	87
5	Magnon transport in YIG with Ta and Pt spin injection and detection electrodes	89
5.1	Introduction	89
5.2	Experimental details	91
5.2.1	Devices	91
5.2.2	Measurement techniques	92
5.3	Results and discussion	92

5.4	Conclusions	100
	Bibliography	101
6	Microwave control of thermal magnon spin transport	103
6.1	Introduction	103
6.2	Experimental setup	105
6.3	Results	106
6.3.1	Nonlocal signals under an rf field	106
6.3.2	Rf-power dependency	107
6.3.3	Rf-power reflection and spin pumping	109
6.4	Discussion	110
6.5	Conclusion	113
6.6	Supplementary Material	114
6.6.1	Sample preparation	114
6.6.2	Experimental setup	114
6.6.3	Local measurement	114
6.6.4	Comparison between the rf-power dependent first and second harmonic signals	117
6.6.5	Rf-power reflection measurement	117
6.6.6	Spin-pumping measurement	118
6.6.7	Excitation current dependency	119
6.6.8	Onsager reciprocity	119
6.6.9	Rf power calibration	120
6.6.10	Temperature effect due to the rf power	121
6.6.11	Rf field strength and precession cone angle	122
6.6.12	Comparison of 210-nm- and 100-nm- thick YIG results	123
6.6.13	Extracting the nonlocal resistances	125
	Bibliography	128
7	A “magnon transistor” on 10 nm thick YIG film	131
7.1	Introduction	131
7.2	Experimental details	132
7.3	Results	134
7.4	Discussion	134
7.4.1	Angle dependent analysis	134
7.4.2	Polynomial analysis of nonlocal signals at specific angles	138
7.4.3	Magnitude of the nonlocal signals	141
7.5	Summary and outlook	142
	Bibliography	144
