Biology of acute myeloid leukemia stem cells

The role of CITED2 and mitochondrial activity

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op
maandag 4 november 2019 om 14.30 uur

door

Katharina Mattes

geboren op 13 juni 1986
te Mistelbach, Oostenrijk

Promotor

Prof. dr. E. Vellenga

Copromotor

Dr. H. Schepers

Beoordelingscommissie

Prof. dr. P.J. Coffe

Prof. dr. W. Helfrich

Prof. dr. G. de Haan

Contents

Chapter 1	General introduction	p.9
Chapter 2	CITED2 affects leukemic cell survival by interfering with p53 activation <i>(Cell Death & Disease, 2017)</i>	p.31
Chapter 3	The transcriptional regulators CITED2 and PU.1 cooperate in maintaining hematopoietic stem cells <i>(Experimental Hematology, 2019)</i>	p.53
Chapter 4	Differential redox-regulation and mitochondrial dynamics in normal and leukemic hematopoietic stem cells: A potential window for leukemia therapy <i>(Critical Reviews in Oncology/Hematology, 2019, in press)</i>	p.79
Chapter 5	CD34 ⁺ acute myeloid leukemia cells with low levels of reactive oxygen species show increased expression of stemness-genes and can be targeted by the BCL2 inhibitor Venetoclax <i>(submitted)</i>	p.109
Chapter 6	Summary, discussion and future perspectives	p.129
Appendices	Dutch summary Acknowledgements About the author List of publications	p.145
