Social stress: The good, the bad, and the neurotrophic factor

Understanding the brain through PET imaging and molecular biology

Bruno Lima Giacobbo

This thesis is valid for a double PhD degree as a collaboration between the University of Groningen, the University Medical Center Groningen, and the Rio Grande do Sul State Pontifical Catholic University. The work on this book has been carried out in the Department of Nuclear Medicine and Molecular Imaging of the UMCG, as well as in the Laboratory of Biology and Nervous System Development of PUCRS.

The research contained in this thesis were financially supported by the Abel Tasman Talent Program (ATTP) of the UMCG and the Coordenação de Aperfeiçoamento de Pessoal de Nível Superior (CAPES) of PUCRS. The printing of this thesis was financially supported by the School of Behavioral and Cognitive Neuroscience (BCN), and by the Library of the University of Groningen.

Table of contents

Chapter 1: Introduction.....	7
Chapter 2: Brain-derived neurotrophic factor in brain disorders: focus on neuroinflammation	22
Chapter 3: Long-term environmental modifications affect BDNF concentrations in rat hippocampus, but not in serum	59
Chapter 4: The effect of repeated social defeat on sociability is inhibited by HPA-axis disruption	81
Chapter 5: Short- but no long-term effect of social stress in rodent depressive-like behavior is not affected by chronic treatment with Harmine	101
Chapter 6: Dopaminergic receptor D2 contribution on aggressive behavior: new insights about acute and chronic conditions	125
Chapter 7: Discussion and future perspectives	142
Chapter 8: English summary	157
Chapter 9: Nederlandse samenvatting.....	163
Acknowledgments.....	169
