A proteogenomic view on antibiotic resistance in pathogenic *Enterobacter* species

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. C. Wijmenga
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 27 November 2019 at 12:45 hrs

by

Suruchi Nepal

born on 17 January 1987
 in Palpa, Nepal

Supervisors

Prof. J. M. van Dijk

Prof. J.W.A. Rossen

Co-supervisor

Dr. E. Bathoorn

Assessment committee

Prof. A. J. M. Driessen

Prof. K. Becker

Prof. W. J. Quax

Paranymphs

Francis M Cavallo

Table of contents

Chapter 1	General introduction and scope of the thesis	9
Chapter 2	An ancient family of mobile genomic islands introducing cephalosporinase and carbapenemase genes in <i>Enterobacteriaceae</i> Published in <i>Virulence</i> . 2018; 9: 1377-1389	34
Chapter 3	A proteogenomic 'sneak preview' on carbapenem resistance development in the <i>Enterobacter cloacae</i> complex Manuscript to be submitted	62
Chapter 4	Multi-omics analyses of clinical isolates belonging to the <i>Enterobacter cloacae</i> complex uncover differences in expression of determinants for antibiotic resistance and virulence Manuscript to be submitted	94
Chapter 5	Antibiotic resistance plasmids cointegrated into a megaplasmid harboring the <i>bla</i> _{OXA-427} carbapenemase gene Published in <i>Antimicrobial Agents and Chemotherapy</i> . 2018; 62: pii: e01448-17	114
Chapter 6	Summarizing discussion and future perspectives	126
Chapter 7	Nederlandse samenvatting Acknowledgements	138
