Acknowledgments

I would like to thank Netspar for financial support during the first three years of the PhD and the University of Groningen for the final year. At Netspar I would like to thank Syliva van Drogenbroek and Sylvia Geurdes for excellent organization of the Netspar conferences. On the Groningen side, I would like to thank Lies Baars, Martine Koolman and all the staff at SOM. The latter deserve a token of appreciation for the effort they put in when we thought that it would be good to have the SMYE in Groningen.

Many thanks go to Ben Heijdra for being the best supervisor that I could have wished for. In an average week I saw Ben more than most PhD students see their supervisor during their entire life. In our daily conversations he supplied me with such a surplus of knowledge that I feel confident in pursuing an academic career. I have benefited from our personal relationship as much as I have benefitted from our professional cooperation. Not only do I cherish fine memories of legendary evenings out but I am grateful for his consideration when times were rough.

I thank Steve Turnovsky for being a very dedicated host during my visit at the University of Washington. Right from the start Steve made me feel at home and he invested much time in our cooperation. At UW cordial thanks also go to Jennifer Carroll for arranging my office and Wen-Jen Tsay for being an outstanding surrogate roommate.

In addition to Steve, I thank Hippolyte d'Albis, Jenny Ligthart and Lex Meijdam for finding the time to be on my committee and reading my manuscript.

A warm thank-you goes to my real roommate, Ryanne van Dalen, for being the best roommate in the world. I will miss the 80's parties in 710 and the nights out in Het Vaatje.

An equally warm thank-you goes to my serial co-author Richard Jong-A-Pin from whom I have learnt many of the tips and tricks of trade. His role in Het Vaatje and numerous pubs around Europe is dutifully acknowledged.

Even during the most disastrous phases of the spring, Janneke, Richard, Ryanne and Viola always put a SMYIE on my face.

I would like to thank the people whom I have worked with over the years. Without Jakob de Haan, Laurie Reijnders, Mark Mink and Martin Gassebner I would not nearly have learnt as much as I did. Being able to pursue projects in different areas of

economics has greatly enhanced my understanding of each of these fields separately.

Dank jullie wel to my colleagues from the 7th floor and my ReMa and PhD buddies from all the other floors.

A big gracias goes to Ana Moreno-Monroy.

A special word of thanks goes to all those activities that prevented me from finishing my PhD earlier. It is truly amazing how I always find something important to do one day before a deadline; updating my Facebook status, checking out new posts on the Failblog, analyzing that age-old Springsteen song, ironing my socks or discussing important matters with Federico Crudu.

I thank Dörte, Florian, Janine, Igor, Konstantin and Olivier for enduring family support.

I want to thank my friends and in particular Giulio, Jan-Dirk, Jelmer, Lianne, Noortje, Pascal, Robert and Wessel for always keeping my feet firmly on the ground. I hope you will forgive me for missing numerous birthdays, barbeques, nights out bowling and afternoons on the golf course. I swear to be around more often from now on.

Finally, I cannot express how much Viola means to me. Our relationship is the stable factor on which I can fall back on independently of what life throws at me. Regardless of how busy she is, she always finds the time to help me, to pick me up when I am down and to celebrate when things are going our way. The way that she deals with all the challenges that life holds is truly remarkable. It is not easy to start a new job, move to a new country and integrate into a foreign culture, yet she does all these things with a surprising ease. Every day with her is a gift.
