# ACKNOWLEDGEMENTS

I want to express my gratitude to all the people who have been a part of my journey during my studies. First and foremost, thank you **Ryan** for guiding me in my pursue of my PhD. You were always willing to help and patiently explain, even if I didn't not understand it at first. I also appreciate the opportunity to visit your laboratory in the States. **Kees**, thank you for your help and all the discussions and challenges to find good arguments to convince you about my results. **Remco**, thank you for explaining calculations/DFT and also doing your best to help us keep a semblance of sanity in our group when things did become complicated, for lending an ear and listening to me complain about the window fiasco and keeping me company for breaks while I was writing my thesis. **Edwin**, thank you for the support and great advices. **Renate**, thank you for helping with all the paper-work. Being an excellent neighbor once I took over Ryan's office, for having more than a few laughs about the issues with the new building and old building were having. During my years as a PhD student, I managed to amass a few lab journals with information that I needed overseas while visiting Ryan. **Alfred**, without your help with this issue, it would not have been solved! **Johan**, even though you might not be a part of the group on paper, I always counted you as an essential part of it. Thank you for all the fun conversations and jokes and for sharing your wisdom (who would have thought!). **Sylvia**, thank you for the delightful conversations and delicious treats you made. I also appreciate the opportunity to walk Mira. **Kristin**, it was fun to finally talk to someone in a Slavic language. I am thankful for the valuable advices and the ajvar. **Natalia**, I apologize for any distress caused by my requests for "simple" calculations that turned out to be not so straightforward. **Viktor**, thank you for sharing your expertise and knowledge, especially in the lab and fluorine project. **Xinkai**, it was fun discussing games and learning from you about SAMs and relevant literature. **Nils**, although your stay in CMMD was somewhat short, I enjoyed working in the lab together, understanding me what it means to work in a controlled chaos, and our squash matches. **Donato**, thank you for being a friend and sharing delicious Italian food. **Rachael**, we spent a reasonable amount of time together in the Groningen and NCSU lab. Thank you for all the advices, for helping around the lab, and slowly making me pick up a Scottish accent, especially after you returned to Groningen from visiting your family. **Nahid**, thank you for helping with the EGAIn and AFM measurements and delicious food. **Yuru**, thank you for the fun time in the shared office and for helping supervise DFT projects during the corona. **Lungani**, thank you for the fun time in the lab and for teaching me about the Rick9000. **Erik**, although you have not been a part of our group in a while, you still managed to hang around and spend some time with us. I hope that one day, you will manage to tunnel through a glass door!!! **Kiana**, I appreciate the fun conversations during the lunch breaks. **Gang**, thank you for teaching me a lot about semiconducting polymers and the fun times in the lab. **Saurabh**, a.k.a. **Dr. Diabito**, did you really think I would forget your nickname? Anyway, thank you for all the discussions during the coffee breaks, all the projects we started/worked on

together and being a support during the writing process. **Sri**, thank you for the squash lesson, it was fun. I would also like to thank all the students. You helped me a lot and taught me a lot about guiding and managing work with different personalities. Being a part of the CMMD, spending time outside the lab, and going on a trip or two with the group helped me weather this path called a PhD!

**Paul, David, Matteo, Eelco, Javier, Teo, Arjan, Maria, Jan Anton**, the POE group, thank you for making me feel like a part of your group and for the fun time during conferences, bouldering lessons, beers, collaborations. **Bouke**, thank you for the support you provided during your time as a technician in the CMMD group. I am delighted to have continued hanging out since I met you during our Master's. **Sanne**, or should I say **Alexandra**, it is as you said in your acknowledgements. We became friend in our Master's degree and we continued in our PhDs, sharing project struggles, talking about video games, showing and teaching me exercises, and yes, I am still shocked about your official name. **Romain** and **Mira**, thank you for all the help with the chemistry, coffee and fun times together. **Jovana** and **Snezana**, girls, I do not believe I will be able to thank you within few sentences, so cheers to more than 15 years of being friends and many more! **Slavo** a.k.a. **Cape**, it only took you eight years for you to finally visit me in the Netherlands. Thank you for all the venting sessions during gaming, and I apologize for introducing you to Destiny 2 (not really!). **Dime**, although we have known each other since high school, we became closer during our university studies, where we also met **Mariche, Ina, and Sale**. Our group expanded even more when **Petre, Marjan, and Simona** joined us. We have spent much time together sharing laughs and fun stories. Even after moving away to different countries, we still get together occasionally, either the two of us or as a group. I want to thank each one of you for the beautiful memories. **Sergej, Ognen, Filip E., and Filip H.**, we were the library crew, always laughing while having coffee during our breaks. After so many years together, our friendship has remained strong even after I moved to the Netherlands by making sure that we go to a kafana at least once every time I am back home. Similarly, I must also mention the UB crew. **Charlie, Lynne, Azad, Asad Angelo, Manno, Eirini, Sambit**, you guys made the long dates in the UB interesting and fun. **Vlatko, Jorde, Biljana, Perica**, and the members of k.r.a. **Keiko**, thank you for the countless hours we spent training and working together to improve and keep on pushing. **Mihailo** a.k.a. **Pols**, where do I even start with you mate? I will not go into the stories we have but say it was always fun to hang out with you and I am really happy to have you as a cousin. **P.S.** you still owe me a trip to London! **Jonne**, we supported each other in a way that we knew, reminding me to keep a work/life balance. We played squash more for the banter than the squash master's titles. Enjoying those summer holidays, a combination of beaches, coffee, and car trips. You taught me what it means to be from Limburg, what the proper Limburgse vlaai is, and what the Carnival in Roermond looks like. I will cherish many more moments like these for the rest of my life. **Baba Dara**, thank you for always providing and caring for me and checking how I am doing. Zoran and Frosina, you are the best parents I can ask for. Thank you for being there and supporting me through this whole process! It will take a while if I continue listing everything, so I will stop here. **Leona**, dear sister of mine, you might be younger than me but also wiser than I have been in many instances. Your support throughout my life, especially after moving to the Netherlands, has been immeasurable. Remember your stay in Groningen

while I was writing my Master's thesis? Remember the sirens that woke us up on the first Monday of the month? This will be one of my favorite stories. Even after writing and rewriting this part, I might have missed a few people to say my thanks to. For that, I apologize from the bottom of my heart, but please remember that you guys have made and are making my life rich with all the friendships and funny stories from our time together. And in the end...
