ADAPTIVE CONTROL OF DYNAMIC BALANCE IN HUMAN WALKING

TOM J.W. BUURKE

COLOPHON

The experiments described in chapter 2, 3, 4 and 5 were conducted at the Center for Human Movement Sciences, University Medical Center Groningen, Groningen, the Netherlands. The experiments described in chapter 6 were conducted at the Locomotor Control Lab, Division of Biokinesiology and Physical Therapy, University of Southern California, Los Angeles, CA, USA.

PhD training was facilitated by the research institute SHARE, part of the Graduate School of Medical Sciences Groningen.

The printing of this thesis was financially support by:

- University of Groningen
- University Medical Center Groningen
- Stichting Beatrixoord Noord-Nederland
- Motek Medical B.V.
- COSMED Benelux B.V.
- Twente Medical Systems International B.V.

Adaptive control of dynamic balance in human walking

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. C. Wijmenga
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on
 Monday 20 January 2020 at 11.00 hours

by

Tom Jan Willem Buurke

born on 8 September 1993
 in Enschede

Supervisors

Dr. C.J.C. Lamoth

Prof. L.H.V. van der Woude

Co-supervisor

Dr. A.R. den Otter

Assessment Committee

Prof. T. Hortobagyi

Prof. A.C.H. Geurts

Prof. I. Jonkers

TABLE OF CONTENTS

CHAPTER 1	General introduction	6
CHAPTER 2	Synergistic structure in the speed dependent modulation of muscle activity in human walking <i>PLoS ONE. (2016) 11(4): e0152784</i>	16
CHAPTER 3	Adaptive control of dynamic balance in human gait on a split-belt treadmill <i>Journal of Experimental Biology. (2018) 221(13): jeb174896</i>	40
CHAPTER 4	Bilateral temporal control determines mediolateral margins of stability in symmetric and asymmetric human walking <i>Scientific Reports. (2019) 9: 12494</i>	62
CHAPTER 5	Handrail holding during treadmill walking reduces locomotor learning in able-bodied persons <i>IEEE Transactions on Neural Systems and Rehabilitation Engineering. (2019) 27(9): 1753-1759</i>	84
CHAPTER 6	Maintaining sagittal plane balance compromises frontal plane balance during reactive stepping in people post-stroke <i>Submitted for publication</i>	100
CHAPTER 7	General discussion	120
APPENDICES	Summary	136
	Samenvatting	140
	Dankwoord	142
	About the author	146
	Scientific output	147
	Conference contributions	148
