Effects of bariatric surgery and vagus nerve stimulation

## **Proefschrift**

ter verkrijging van de graad van doctor aan de  
Rijksuniversiteit Groningen  
op gezag van de  
rector magnificus prof. dr. ir. J.M.A. Scherpen  
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 4 december 2024 om 12.45 uur

door

**Christiaan Warner Hoornenborg**

geboren op 9 februari 1992

## **Promotores**

Dr. A. van Beek

Prof. dr. G. van Dijk

## **Beoordelingscommissie**

Prof. dr. F. Kuipers

Prof. dr. A.J. Moshage

Prof. dr. H. Pijl

## TABLE OF CONTENTS

Chapter 1	General introduction and aims	9
<b>Part I   Effects of bariatric surgery on energy balance</b>		
Chapter 2	Weight loss in adult male Wistar rats by Roux-en-Y gastric bypass is primarily explained by caloric intake reduction and pre-surgery body weight. <i>American Journal of Physiology</i> 2024 326 (6) R507-R514	33
Chapter 3	A high fat with sucrose diet results in dysregulated eating and deteriorated beta cell sensitivity in a rat model of Roux-en-Y gastric bypass surgery.	57
Chapter 4	Ileal transposition: A non-restrictive bariatric surgical procedure that reduces body fat and increases ingestion-related energy expenditure <i>Physiology &amp; Behavior</i> 2020; 219:112844	77
<b>Part II   Effects of vagus nerve stimulation on energy balance</b>		
Chapter 5	Acute sub-diaphragmatic anterior vagus nerve stimulation increases peripheral glucose uptake in anaesthetized rats <i>IBRO Neuroscience Reports</i> 2023; 15: 50-56	103
Chapter 6	Vagus nerve stimulation increases circulating TNF- $\alpha$ levels without any negative consequences on energy balance parameters in freely moving type 2 diabetic rats	121
Chapter 7	Summary, discussion and future perspectives	141
<b>Appendices</b>		
	English summary	167
	Nederlandse samenvatting	171
	Acknowledgements	176
	Curriculum vitae	179
	List of publications	180
