Drivers of Distribution Patterns of Mesoamerican Tropical Forest Birds

Vicente de Jesús Castillo Chora

university of
 groningen

Drivers of Distribution Patterns of Mesoamerican Tropical Forest Birds

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. J.M.A. Scherpen
 and in accordance with
 the decision by the College of Deans

and

to obtain the degree of PhD of the
 Universidad Nacional Autónoma de México
 on the authority of the
 Rector Dr. L. Lomelí Vanegas
 and in the accordance with
 the decision by the Assessment Committee of the
 Master and Doctoral Program of Biological Sciences

Double PhD degree

This thesis will be defended in public on
 Tuesday 10 December 2024 at 16.15 hours

by

Vicente de Jesús Castillo Chora

born on 23 March 1991
 in Mexico city, Mexico

Supervisor

Prof. R.S. Etienne

Co-supervisor

Dr. A.G. Navarro Sigüenza

Assessment Committee

Prof. C. Both

Prof. M. Del Coro Arizmendi Arriaga

Prof. W. Gosling

Prof. B. Milá

Content/Inhoudsopgave/Índice/

Chapter 1: Drivers of distribution patterns: from communities to populations	1
Introduction	2
<i>Macroevolutionary drivers of diversity</i>	3
<i>Niche-based processes of community assembly</i>	4
<i>Geographic and genomic view of the speciation</i>	5
<i>Avian diversity of the Mesoamerican lowland forests</i>	6
<i>Effects of Pleistocene climate shifts on bird diversification in the Mesoamerican lowland forests</i>	7
<i>Objectives and outline of the thesis</i>	9
References	11
Chapter 2: Macroevolutionary drivers of passerine diversity on Yucatan Peninsula	18
Abstract	19
Introduction	20
Methods	22
<i>Geographic and genetic sampling</i>	22
<i>Estimation of divergence times</i>	22
<i>Colonization and branching times</i>	23
<i>Model fitting and model selection</i>	24
<i>Model performance</i>	25
Results	25
<i>Model Performance</i>	28
Discussion	29
<i>Time and mode for community assembling in Yucatan Peninsula</i>	31
Acknowledgments	35
References	35
Supplementary Material	39
Chapter 3: Ecological niche conservatism and diversification in a clade of New World Jays from the tropical lowland forests of Mesoamerica	49
Abstract	50
Introduction	51
Methods	54
<i>Study area</i>	54
<i>Species occurrences and environmental data</i>	55
<i>The ellipsoid model approach to delimit and compare climatic requirements</i>	56
<i>Model transference to geography</i>	57
<i>Testing for ecological barriers in the lowlands of Mesoamerica</i>	57
Results	58
<i>Ellipsoid approach in geographic space</i>	58

<i>Paleo-distributions based on Ecological Niche Models</i>	60
<i>Ecological barriers in the Mesoamerican lowland forests</i>	61
Discussion	61
<i>Insights into historical and current ecological discontinuities in the tropical lowland forests of Mexico</i>	63
Conclusion	67
Acknowledgments	67
Data availability statement	67
References	68
Supplementary Material	76
Chapter 4: Contact zones: integrating and interpreting multiple lines of evidence	78
Abstract	79
Introduction	80
<i>An ecological perspective of hybridization and introgression</i>	81
<i>Patterns of genomic differentiation</i>	82
<i>Phenotypic consequences of introgression</i>	84
<i>Mito-nuclear discordance and coevolution</i>	85
<i>Integrating the different lines of evidence</i>	87
<i>Introgression and the spatial distribution of populations</i>	87
<i>Variation in contact zones</i>	89
<i>Mito-nuclear discordance and coevolution</i>	91
<i>Predicting the movement of populations in the changing adaptive topography</i>	93
Conclusion	94
Acknowledgements	94
References	95
Glossary	103
Chapter 5: Synthesis	104
<i>Summary of the conclusions</i>	105
<i>Environmental filters and community assembling</i>	107
<i>Functional traits and secondary sympatry and species coexistence</i>	108
<i>Integration between climate constraints and macroevolutionary drivers of community Assembly</i>	111
Conclusion	115
References	116
Summary	122
Samenvatting	123
Resumen	124
Acknowledgements	125
