Liposome Interactions with Biological Systems: A Journey into Cells

Keni Yang

2020

The work described in this Thesis was performed in the department of Pharmacokinetics, Toxicology and Targeting at the Research Institute of Pharmacy (GRIP), University of Groningen (RUG), the Netherlands, and financially supported by the China Scholarship Council (CSC).

Printing of this Thesis was financially supported by the University Library and the Graduate School of Science, Faculty of Science and Engineering, University of Groningen, the Netherlands.

Cover & Layout: Keni Yang

Liposome Interactions with Biological Systems: A Journey into Cells

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. C. Wijmenga
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Friday 8 May 2020 at 09.00 hours

by

Keni Yang

born on 27 November 1989
 in Guangxi, China

Supervisors

Prof. A. Salvati
Prof. K. Poelstra

Assessment Committee

Prof. F. Stellacci
Prof. G. Storm
Prof. W.J. Quax

Table of Contents

Chapter 1: General Introduction and Scope of the Thesis	1
1. Nanomedicine.....	2
2. Biological challenges of nanomedicines for their clinical translation.....	4
3. Extracellular and intracellular nano-bio interactions.....	6
4. Liposome targeting with endogenous components	18
5. Scope and outline of the Thesis.....	20
References	23
Chapter 2: Tuning Liposome Composition to Modulate Corona Formation in Human Serum and Cellular Uptake	31
ABSTRACT	32
1. Introduction	32
2. Materials and methods.....	35
3. Results and discussion.....	42
4. Conclusions	58
Acknowledgments	60
References	61
Supplementary Materials.....	65
Chapter 3: Effects of Protein Source on Liposome Uptake by Cells: Corona Composition and Impact of the Excess Free Proteins.....	83
ABSTRACT	84
1. Introduction	84
2. Materials and methods.....	86
3. Results and discussion.....	93
4. Conclusions	103
Acknowledgements	104
References	105
Supplementary Materials.....	109
Chapter 4: Comparison of the Uptake Mechanisms of Zwitterionic and Negatively Charged Liposomes by HeLa Cells.....	113
ABSTRACT	114
1. Introduction	114
2. Materials and methods.....	116
3. Results and discussion.....	120
4. Conclusions	127

Acknowledgments	129
References	130
Supplementary Materials.....	134
Chapter 5: Tuning Liposome Stability in Biological Environments and Intracellular Drug Release Kinetics	139
ABSTRACT	140
1. Introduction	140
2. Materials and methods.....	142
3. Results and discussion.....	148
4. Conclusions	157
Acknowledgments	158
References	159
Supplementary Materials.....	162
Chapter 6: Cell Membrane Nanoparticles to Probe the Interactions between Stromal and Cancer Cells in Acute Myeloid Leukemia.....	167
ABSTRACT	168
1. Introduction	168
2. Materials and methods.....	170
3. Results and discussion.....	177
4. Conclusions	186
Acknowledgements	187
References	189
Supplementary Materials.....	193
Chapter 7: General Discussion and Future Perspective	197
References	209
Nederlandse samenvatting.....	211
Acknowledgements.....	217
List of publications	223
Manuscripts submitted or in preparation.....	224
Conferences attendance and presentations	225
