Acknowledgements

I have had the help, guidance, support and love of many wonderful people along my PhD journey. I would like to take this opportunity to express my gratitude to all of you.

First, I would like to thank **Prof. Dr. Rudi Dierckx**, my first *promotor* for giving me the opportunity to conduct my PhD research. You may write the shortest e-mails I have ever received, but when it came to our face-to-face meetings, I always walked out of your room bursting with ideas. I greatly appreciate the flexibility that you allowed me in the research. I would also like to thank **Prof. Dr. Csaba Nyakas**, my second *promotor*. You made me look at the project from a completely different perspective. Your enthusiasm and sense of hard work are inspiring.

I would like to express my immense gratitude to **Dr. Aren van Waarde**, my supervisor (*co-promotor*). Aren, you are the nicest supervisor anyone could ask for. You taught me the ins and outs of PET imaging, not in a class room or while sitting in your office, but while working alongside me. You were always available to come down to the lab, and to lend me a hand, whether it was for keeping time during the scan or for running the HPLC for metabolite analysis. With my phobia of the Dutch agenda, I am forever grateful that I could walk into your room without prior appointments. Whatever problems I had, you usually had a solution, or if you didn't have an answer yourself, you would know who else I could consult. I am in awe of your ability to convert my writings to publishable manuscripts. Thank you for teaching me that even negative results have a positive message in them.

Prof. Dr. Paul Luiten, thank you for bringing my CV to the notice of Rudi so that I got this PhD position and for your continued interest in my activities.

I would like to thank the members of my reading committee, **Prof. Dr. Guy Bormans**, **Prof. Dr. Johan A. den Boer** and **Prof. Dr. Adriaan A. Lammertsma** for evaluating my thesis.

I would also like to extend my thanks to **Prof. Dr. Philip Elsinga**, **Dr. Erik de Vries** and **Dr. Antoon T.M. Willemsen**. I have come to all of you numerous times over my PhD and found you willing to listen to my problems and to give me your time for discussions. When preparing for the Monday morning presentations, I would try to anticipate your questions, but somehow you would have more interesting questions every single time! Thank you for your support throughout my project.

I would like to thank **Prof. Dr. Kiichi Ishiwata** for his collaboration and comments on all my manuscripts. Thanks are also due **Prof. Dr. Johannes H. Proost** for collaboration on the NONMEM paper and also for several PK-PD discussions.

My special thanks to **Chantal Kwizera**, for preparing my tracer throughout the project. I am also sorry for stressing you out every single time! I am hugely grateful to have had the help of **Jurgen Sijbesma**. Thank you for teaching me the surgical and injection techniques for the microPET scans; you are a wonderful teacher. Thank you also for scheduling my scans, transporting my animals, helping me with my scans and lots more. All the best for your PhD!

I would like to thank **Gert Luurtsema**, for his collaboration on the drug studies and **Marianne Schepers** for her help with the UPLC-MS analysis. As you can see in this thesis, that data really added value to the chapters.

Klaas-Willem Sietsma, thank you for your prompt help with all things IT, whether it is misbehaving computers or forgotten passwords or extension of access. **Bram, Hilde, Joost, Michel, Janet, Ewout, Hans Pol**, thank you for your technical help, for the friendly banter and all your help at various points throughout the PhD. **Johan, Roel, Sergiy, Noortje, Marcel, Michel**, thank you for your help with safety training, for advice on image reconstruction and data analysis and for your company on the trips to E00.

I wish to acknowledge the help provided by **Annie van Zanten** in the beginning, and **Annegrit Wijker** in the later stages of my PhD with regards to approving funds for equipment, conference costs, drugs etc and for the PhD extension.

Sarita, I would like to thank you for making all the arrangements towards the end of my PhD.

I am also appreciative of the opportunity to interact with the medical doctors of our department, like **Dr. Jan Pruim**, especially at the Monday morning meetings, because you made me think about the ultimate purpose and application of my research.

I would also like to thank my fellow researchers at NGMB. **Zilin, Nathalie, Anniek**, I think we had the best room of the department, so harmonious and peaceful. Thank you for having desks as messy as mine and for making me feel right at home. Additionally, Nathalie, thank you for teaching me how to paint my house; that red wall gave me so much satisfaction! Zilin, I thank you for providing information on all the latest gadgets. Anniek, I thank you for being my best friend during the PhD and now, for agreeing to be one of my *paranimfen*. Thank you for teaching me the best way to open a rat's skull, for forcing me to try uncomfortable things (remember our trek into the forest, the leech socks, the tiger's pug marks in the mud...) that created such wonderful memories, for your limitless enthusiasm, for your companionship during all our travels, for laughing at my follies and for letting me laugh at yours.

All the girls in the "girl's room", **Ania, Ines, Leila, Valentina, Mehrsima, Daniele**, thank you for being a part of my PhD journey. Any time I was feeling a bit low, all I had to do was pop over to your room and there would be someone who has already experienced what I was worrying about and had a solution or at least sympathy for me. And all the "boys", **Siddhesh, Khayum, Shivashankar, Soumen, Vladimir, Willem Jan, Andrea, Chao, Alex** thank you for lending me a hand (or several) whenever I was in need. I would also like to thank my other colleagues **Janine, Ate, Ewelina, Giuseppe** and **Heli** for your friendship and the great discussions conducted sometimes standing at the top of the stairs or along the corridors. Special thanks are due to **Gaurav** for all the advice in the beginning and even now.

I am also grateful to have had the opportunity to interact with all the other staff of NGMB. Thank you for making my stay in the department so pleasant.

I am particularly grateful to **Dr. Bauke Buwalda** for allowing me to take the shock box to CDP for my experiments.

Wanda Douwenga, thank you for looking after my animals and samples and for your help with scheduling, both in Haren and Zernike.

I would like to thank the animal welfare officers, **Catriene Thuring** and **Miriam van der Meulen-Frank**, for the diligence with which they perform their work and for their willingness to listen.

My heartfelt thanks to the wonderful staff at CDP, **Wiebe Hofstra**, **Alex Kluppel**, **Flip Klatter**, **Silvia Kiewiet**, **Andre Zandvoort**, **Ar Jansen**, **Hester Geleynse** and several others. Thanks also to **Wolter de Goede** and **Ben Vorenkamp** for the construction of my behavioural study equipment.

Erika Atutxa, **Piray Atsak**, **Romy Wichmann** and **Raquel Fornari**, thank you for letting me borrow various equipments and also for instructions on surgical techniques. I would like to thank **Krisztina Marosi** for performing the western blots.

Special thanks to the ladies of BCN office, **Diana Koopmans**, **Janine Wieringa** and **Evelyn Kuiper** for their prompt replies to all my doubts and questions regarding the courses and conferences.

My deepest thanks go to **Chaithra-Dhananjaya**, **Baiju-Abdul**, **Alphine-Martin** for being like second parents to Tejus. Thank you for all the times that you picked Tejus up from school or daycare when I had to call you due to delays at the lab. Thanks are also owed to **Gomathy**, **Jaya**, **Sushmita** and **Veda** for all the times that they helped me with Tejus. Without a support network like all of you, I could never have done my PhD with peace of mind. **Chaithra**, I thank you also for motivating me to complete my swimming diploma. If it wasn't for you, I would have given up any number of times when exhausted at the end of a hard week. It is funny how you have more energy at the end of a swimming lesson than what you had at the beginning!

My special thanks to friends and colleagues from GSK Singapore, **Aveline**, **Shab**, **Zee**, **Kazufumi Hirano** and my boss **Darrel J. Pemberton** for encouraging me to do my PhD, for believing in me and for supporting me through out. My friends, colleagues and bosses at Dr. Reddy's, Hyderabad, while I was working with you, all my thoughts were on some day getting back to doing research and I didn't appreciate what I was gaining. Now I thank you wholeheartedly because the skills and knowledge I acquired then are used every day in my research.

I would like to express my gratitude towards my parents **Dr. Ramakrishnan** and **Dr. Girija** and my Amma, **Dr. Indira** in heaven, for their unconditional love and support. Thank you little sister **Dr. Neetha (Cinni)** for your love, for just being there and for letting me leave Skype calls open while alone at home and writing

my thesis. Thank you **Uday**, for cooking me tasty meals, for all our travels around Europe and for being the best brother-in-law possible. I thank my grandparents **Susheela** teacher, **Prof. Dr. A Krishna Rao** and late **Prof. Dr. Padma Rao** for being the inspiring people they are. Huge thanks also to my huge extended family, my *Mamanmaru, Ammayimaru, Mema, Chachanmaru, Auntimaru, Chettanmaru, Chechimaru, Aniyanmaru, Aniyathimaru*, and little and not so little nephews and nieces and my Manipal family (sorry for not naming all of you, or I would need yet another thesis book!) for your love and understanding even when the Skype calls, phone calls, Facebook updates and e-mails dried up.

Special thanks are due my in-laws **Papamma** and **Pilla Reddy**, my sisters-in-law **Aruna, Komala** and **Lakshmi** and brothers-in-law **Ashok** and **Srinivas** for your love and blessings and for sharing Venkatesh with me.

My love and thanks to my elder son **Tejus** for his understanding and tolerance of his mother's cranky moods and wild exuberances based on how each of the projects were turning out. Thank you for never complaining about all the school trips and functions that I missed. Thank you my baby **Pratyush**, for sleeping tight and letting me sneak out of the room on so many nights to finish writing the thesis.

Finally, I would like to thank the most important person in my life, my husband **Dr. Venkatesh Pilla Reddy**. Thank you for adding to my joys, for taking away my stresses and for being there for me in every way possible. Thank you for learning to cook so that we always had good food even when I was busy or away, for taking turns with me so that at least one of us was always there for Tejus' important occasions. Thank you for giving as much importance to my ambitions as you give yours. And finally, thank you for your constant nagging without which this thesis may have taken even longer to write. You can stop it now Kanna, the thesis writing is finally done.

Nisha Kuzhuppilly Ramakrishnan

"A reader lives a thousand lives before he dies.
The man who never reads lives only one."
— George R.R. Martin, *A Dance with Dragons*
