The roles of *MYO5B* in epithelial cells and the intestine

A focus on microvillus inclusion disease

Changsen Leng

The roles of *MYO5B* in epithelial cells and the intestine

A focus on microvillus inclusion disease

This research was financially supported by: China Scholarship Council (CSC), Graduate School of Medical Science, University of Groningen, De Stichting De Cock-Hadders, TKO Strong Foundation, The Daniel Courtney Trust

The experiments described in this thesis were conducted at: Department of Biomedical Sciences of Cells and Systems, section Molecular Cell Biology, Groningen University Institute for Drug Exploration (GUIDE). University of Groningen, University Medical Center Groningen, Groningen, the Netherlands

ISBN: 978-94-034-2688-4 (Printed)

ISBN: 978-94-034-2689-1 (Digital)

Thesis design: Changsen Leng

Cover: Fluorescent images of control mouse intestine (left) and *myo5b* knockout mouse intestine (right) with DAPI (blue) and NHE3 (green) staining.

Printing: Ridderprint B.V., Ridderkerk, the Netherlands

The roles of *MYO5B* in epithelial cells and the intestine

A focus on microvillus inclusion disease

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 29 June 2020 at 9.00 hours

by

Changsen Leng

born on 3 March 1990
in Henan, China

Supervisors

Prof. S.C.D. van IJzendoorn

Dr. B.N.G. Giepmans

Assessment Committee

Prof. K.N. Faber

Prof. R.H.J. Houwen

Prof. J. Klumperman

Paranimfen:

Yue Sun

Karin Klappe

Contents

Chapter 1	9
Introduction and scope of the thesis	
Chapter 2	25
Pharmacological interventions in microvillus inclusion disease: where do we stand and where to go	
Chapter 3	55
Loss of <i>MYO5B</i> impairs lysosome integrity and enterocyte viability in microvillus inclusion disease	
Chapter 4	97
Antioxidant treatment as a novel therapeutic option for microvillus inclusion disease	
Chapter 5	121
Loss of <i>MYO5B</i> expression deregulates late endosome size which hinders mitotic spindle orientation	
Chapter 6	171
Loss function of <i>MYO5B</i> sensitizes colorectal cancer Caco2 cells to cisplatin	
Chapter 7	191
Summary and perspectives	
Nederlandse samenvatting	203
Acknowledgements	215
About the author	221
