Completing this thesis has been both a rewarding and challenging journey especially with the pandemic accompanying the entire first two years of my PhD. I feel very lucky to have met many kind people who supported me along the way, without whom this work would not have been possible.

First and foremost, I would like to express my deepest gratitude to my supervisors. **Gertjan**, I am so thankful for your guidance, patience, and encouragement and all the discussions that we had throughout my PhD. I will never forget that I had worked with an excellent mentor. **Lidewij**, really appreciated that you kept everything on the right path and remind us to plan for everything. **Sahar** thank you for always being available whenever I needed support. I've learned so much from our meetings and conversations.

I would like to thank the members of the reading committee for their time in reviewing my thesis. **Harro** thanks a lot for the help with TLW work. Many thanks to **Wanda** and **Jan B.** for their invaluable assistance in setting up and conducting the experiments. Thanks also to **Gerard**, **Kunja**, **Jan K.**, **Lena**, and **Henk** for helping with and teaching me the lab techniques. Thanks to **Martijn** for providing help in the animal facility and the excellent comments and discussion. Special thanks to **Zsofi** for offering help during the most challenging time at the start of the animal work.

To all the wonderful students I've had the pleasure of working with, **Andriana**, **Rafael**, **Gideon**, **Thomas**, **Sasha**, **Nephthys**, **Jorick**, **Mariia**, **Melissa**, **Nynke**, **Chay**, **Manon**, and **Daan**. these years. Thank you for giving me strength and always having delicious food ready every time we get together.

To my beloved cat **Mimi**. Thank you for wandering outside my room and stepping through my door on that random summer afternoon. From that moment on, our souls have been tightly bound together. I had been expecting to see you every single afternoon as I rode my bike home. The soft rhythm of your purring on my lap have brought warmth, comfort, and joy to my days. You are the most unforgettable Dutch elements that will dwell in my heart forever.

To my fiancée. Dear **Yongyan**. This is the 11<sup>th</sup> year since we have been together. Your belief in me has been a constant source of strength and motivation whenever I doubted myself. Your love and support meant everything to me throughout this journey. I feel so lucky that we spent over 4 years together in a different country, I cannot imagine how things would have been without you by my side. Asking you to be my girlfriend is the best decision that I have ever made, it changed my life in the most beautiful way. And I know it will continue to do so as you become my wife and the mom of our future kids.

To my family, my mom, dad, and sister. Thank you for your boundless love and unconditional support.

Last but not least, I want to express my gratitude to the Chinese Scholarship Council (CSC). My journey in the Netherlands wouldn't have begun without this crucial support.

For the rest of the people I forgot to mention, this is just forgetfulness, thank you anyway!
