Ladies and Gentlemen... Now we have a winner. In the world corruption league, the grand prize goes to... Mr. Soeharto, the former president of Indonesia! Let's have a loud cheer for the most corrupt president in the globe! (see, Transparency International: *The Global Corruption Report 2004*).

That is my personal reason why I am now in the research area of corruption. But it would have never happened without Jakob de Haan. On the very first day I formally became a part of the University of Groningen, he asked me if I were interested in this issue. Since then till the day I completed this thesis, my days and nights were only about corruption. And, as will be shown in this dissertation, corruption is a serious problem.

This thesis is the result of collaboration with many people. First of all, I have to mention again Jakob de Haan, a person with many roles: supervisor, discussion partner, and co-author; without him I could not have completed my PhD project. I also enjoyed working with Emmanuel Pandu and Paul Elhorst. Two chapters in this dissertation were written with them. Like Paul Elhorst, Maarten Allers inspired me to investigate spatial issues in governance. Tom Wansbeek's comments have very much improved the chapter on corruption persistence. Jan-Egbert Sturm and Richard Jong-A-Pin introduced the RATS program enabling me to run millions of regressions. Paramita Muljono of the UEA-UK kindly shared her data on the Global Competitiveness Report. Ward Romp gave me his beautiful L^AT_EX program. Also, I am indebted to the reading committee—Niels Hermes (University of Groningen), Tom Wansbeek (University of Amsterdam), and Martin Paldam (University of Aarhus, Denmark)—for their willingness to read the final manuscript and for their valuable comments. Certainly, I thank the

two paronyms—Poppy and Jeroen—who have helped me a lot in arranging many things before and during the defence.

Some other names have to be mentioned. Anneke Toxopeus and the other nice people at the ISD-RUG were always helpful whenever I had questions or came to their office with the blue envelope from the *Belastingdienst*. I thank the management of the Ubbo Emmius Scholarship program who made me possible to do my PhD project at this University. Astrid, Dity, Ellen, Rina, and Martin from SOM who have helped me a lot.

Groningen, even the Netherlands, is geographically not a big place. Yet, there are many friends who have supported my study, directly and indirectly: those in PPI, PD, and GBI. Also, the relatives in the Netherlands have played their own roles. It is impossible to list all of them, but their names are written in my heart.

I am thinking of my parents and parents in law in Indonesia. From a distance, I believe, they pray for me. Finally, a very special thanks must be given to Mia for her patience and support in days and nights, sadness and happiness, summer and winter. She is a blessing from God. I cannot imagine what I could do without her on my side. Now, as promised, I have more time to spend with her.

Harry Seldadyo

Contents

1	Setting the Scene	1
1.1	Basic Story	1
1.2	Main Findings	6
1.2.1	Determinants of Corruption	6
1.2.2	Corruption Persistence	7
1.2.3	Governance and Growth	8
1.2.4	Spatial Dimension	9
2	Determinants of Corruption: A Survey	11
2.1	Introduction	11
2.2	Corruption: Definition and Measurement	12
2.2.1	Definition	12
2.2.2	Measurement	13
2.2.3	Criticisms	17
2.3	Determinants of Corruption	20
2.3.1	Four Classes	20
2.3.2	Empirical Issues	29
2.4	Concluding Remarks	31
3	On the Sensitivity of Corruption Determinants	33
3.1	Introduction	33
3.2	The Setup	34
3.3	Some First Results	38
3.4	Effect of Observations	45

3.5	Concluding Remarks	54
4	Is Corruption Really Persistent?	57
4.1	Introduction	57
4.2	Convergence: Preliminary Evidence	59
4.3	A Closer Look	70
4.4	Markov Chain Analysis	74
4.5	Conclusion	79
5	Governance and Growth Revisited	81
5.1	Introduction	81
5.2	Governance: Concept and Construct	83
5.3	Governance and Growth	88
5.3.1	Parsimonious Model	88
5.3.2	Effect of Observations	89
5.3.3	Sensitivity Analysis	90
5.4	Conclusion	93
6	Geography and Governance: Does Space Matter?	95
6.1	Introduction	95
6.2	Spatial Dependence	97
6.2.1	Preliminary Evidence	97
6.2.2	Spatial Regression Models	100
6.2.3	Data	102
6.2.4	Results	104
6.3	Spatial Heterogeneity	108
6.3.1	Local Statistics	108
6.3.2	Geographically Weighted Regression	112
6.4	Conclusion	115
7	Putting the Pieces Together	117
7.1	Conclusions and Limitations of the Research	117
7.2	Policy Implications	121

Bibliography	123
Appendix	139
Samenvatting (Summary in Dutch)	155

List of Tables

2.1	Indicators of Corruption, Correlation and Summary Statistics	18
3.1	Robustness Analysis (No \mathbf{F} , \mathbf{Z} up-to-3)	40
3.2	Robustness Analysis ($\mathbf{F}=0$, \mathbf{Z} up-to-4 and up-to-5)	43
3.3	Robustness Analysis ($\mathbf{F}=0$, \mathbf{Z} up-to-3, Various N)	48
3.4	Robustness Analysis ($\mathbf{F}=0$, \mathbf{Z} up-to-4, Various N)	51
3.5	Robustness Analysis ($\mathbf{F}=0$, \mathbf{Z} up-to-5, Various N)	53
4.1	Losers and Winners 1984-2003	61
4.2	Corruption Correlation Over Time	63
4.3	Ordered Logit Regression	65
4.4	Ordered Probit Regression	67
4.5	Tests of β -Convergence	69
4.6	Tests of σ -Convergence	70
4.7	Modality (Rescaled) ICRG data	74
4.8	Markov Chain Estimates, 1984-2003	78
5.1	Correlations among the ICRG Indicators of Governance	85
5.2	CFA Estimates	87
5.3	Parsimonious Growth-Governance Regressions	89
6.1	Moran's I and Geary's c for Governance	100
6.2	Spatial Governance using \mathbf{W}^1	105
6.3	Spatial Governance using \mathbf{W}^2	107
6.4	Normalization by Largest Eigenvalue (\mathbf{W}^{1*} and \mathbf{W}^{2*})	110

6.5	Significance Tests	115
