# **Transplantation of Suboptimal Donor Livers: Exploring the Boundaries**

**Proefschrift**

ter verkrijging van de graad van doctor aan de  
Rijksuniversiteit Groningen  
op gezag van de  
rector magnificus prof. dr. C. Wijmenga  
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op  
woensdag 04 november 2020 om 14.30 uur

door

**Otto Boudewijn van Leeuwen**

geboren op 15 november 1995  
te Apeldoorn

## Table of contents

<b>Chapter 1</b>	General introduction and outline of this thesis	11
<b>Part I: Transplantation of suboptimal donor livers: determining the boundaries</b>		
<b>Chapter 2</b>	Biliary complications following liver transplantation <i>In: Clavien PA, Trotter JF, editors. Medical and Surgical Care of Liver Transplantation Patients. Wiley-Blackwell; 2020</i>	19
<b>Chapter 3:</b>	Donor hepatectomy time influences ischemia-reperfusion injury of the biliary tree in donation after circulatory death liver transplantation <i>Surgery. 2020 (in press)</i>	45
<b>Chapter 4:</b>	Donor blood composition is a risk factor for biliary injury in donation after circulatory death liver transplantation <i>Submitted for publication</i>	65
<b>Chapter 5:</b>	Selected liver grafts from donation after circulatory death can be safely used for retransplantation <i>Transpl Int. 2020 (in press)</i>	85
<b>Part II: Transplantation of suboptimal donor livers: expanding the boundaries</b>		
<b>Chapter 6:</b>	Hypothermic oxygenated machine perfusion reduces bile duct reperfusion injury after transplantation of donation after circulatory death livers <i>Liver Transpl. 2018;24:655-664</i>	105
<b>Chapter 7:</b>	Extended hypothermic oxygenated machine perfusion enables ex situ preservation of porcine and human livers for up to 24 hours <i>JHEP Rep. 2020 (in press)</i>	125
<b>Chapter 8:</b>	Transplantation of high-risk donor livers after ex situ resuscitation and assessment using combined hypo- and normothermic machine perfusion: a prospective clinical trial. <i>Ann Surg. 2019;270:906-914</i>	149
<b>Chapter 9:</b>	Ex situ machine perfusion of human donor livers via the surgically reopened umbilical vein: a proof of concept. <i>Transplantation. 2019;103:2130-2135.</i>	171

<b>Chapter 10:</b>	Summary, Discussion and Future Perspectives	185
<b>Appendix I:</b>	Case report related to Chapter 6:	
	The first report of successful transplantation of a pediatric donor liver graft after hypothermic machine perfusion <i>Pediatr Transplant. 2019;23:e13362</i>	199
<b>Appendix II:</b>	Communication related to Chapter 8:	
	Viability criteria for functional assessment of donor livers during normothermic machine preservation <i>Liver Transpl. 2018;24:1333-1335</i>	211
	Nederlandse samenvatting	217
	List of publications	225
	Dankwoord	229
